Subject: Power lines through the City of Portsmouth

Categories: Consultation Response

Dear Sir / Madam,

As a very long term resident of Portsmouth I strongly object to the Aquind project.

This is not only one of the most densely populated Cities in England but in the whole of Europe!!!! So why choose to run this through our City.

Who in their right mind would decide to tear up and disrupt this City with years (yes several years) of building this project, it is absolutely crazy.

I'm too exhausted to list all the obvious negative impacts it will have on myself and the local Portsmouth population. Please, please think this through and think about the absolute misery it will create for the local population because Aquind certainly don't care. Making token gestures of building a playground don't hide that fact!, they won't be able to bribe this City's residents unlike the dozens of Tory MP's who have happily received thousands of pounds in bribe money (sorry did I say bribes, no I must have meant donations) how generous and kind hearted of them!, this all stinks of corruption.

The only one's they care about are themselves and their billion dollar business.

Yours very very sincerely,

David Winter
