

Over 30 years' experience in delivering secure, sustainable and affordable energy

IFA Interconnector

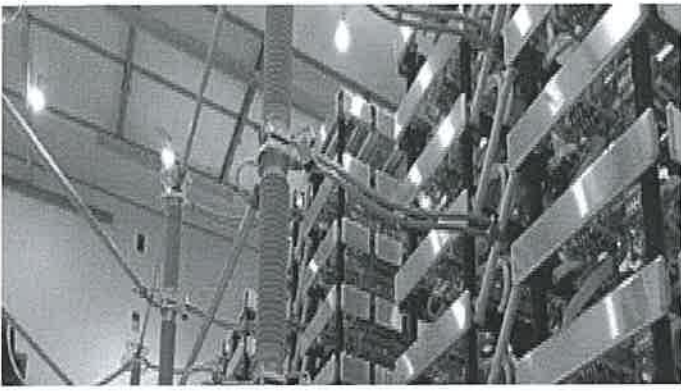

Interconnexion France-Angleterre (IFA) is a joint venture between the French Transmission Operator RTE and National Grid, operating the subsea electricity link between Great Britain and France, commissioned in 1986.

IFA2 Interconnector

Commissioned in 2020, IFA2 is the second link to France that National Grid has developed with RTE.

Our interconnectors deliver secure and affordable electricity and play a critical role in tomorrow's cleaner and smarter energy systems. We sell the capacity to energy traders and provide services to transmission system operators in the UK and France.
