# APPENDIX 5.7 GROUNDWATER CUMULATIVE EFFECTS ASSESSMENT MATRIX (STAGE 1 & 2)

---

## 1.1. INTRODUCTION

- 1.1.1.1. This document should be read in conjunction with Chapter 29 (Cumulative Effects) of the Environmental Statement ('ES') (document reference 6.1.29), Chapter 19 (Groundwater) of the ES Volume 1 (document reference 6.1.19) and Appendix 19.5 (Groundwater Cumulative Effects Assessment (Stage 3 & 4)) of the ES Volume 3 document reference 6.3.19.5).
- 1.1.1.2. Further to the review of cumulative projects and assessments undertaken in May 2020 which also identified and assessed additional projects submitted (Section 20.2 of 7.8.1 ES Addendum), this list below has been updated in March 2023 and the following updates to Stage 1 and 2 assessments are presented in Table 1.
- 1.1.1.3. Projects that are no longer in the datasets where applications have been withdrawn have strikethroughs in the matrix and are coloured **orange**. In addition, projects where construction is complete have strikethroughs and are coloured in **red** as the revised construction programme for the Proposed Development is 2024-2027 and therefore, those projects will be completed prior to construction works for the Proposed Development having begun. Where necessary, schemes which have been constructed have been identified as new receptors, presented in Appendix 5.2 (document reference: 7.8.3.12).
- 1.1.1.4. New projects that have come forward have been included within the matrix below and are illustrated in Figures 5.1, Appendix 5.17 of ES Addendum 3 (document reference 7.8.3.28). New projects were included where the works fell within the Zones of Influence and were of a nature and scale to be considered for cumulative assessment. In addition, where project updates are available these have been taken into account and included below. These projects and/or updates are coloured in **green**.

- 1.1.1.5. Furthermore, as part of this review additional clarity has been provided regarding a series of development which were classified as “construction complete” as part of the 2019 ES. It was considered that construction of these scheme would have been complete prior to the commencement of construction for the Proposed Development and cumulative effects were therefore not anticipated to arise. These schemes were considered as baseline receptors as part of the 2019 ES assessment. Updated text in this regard is also coloured in green for completeness.
- 1.1.1.6. The Cumulative Effects Assessment (‘CEA’) for the Proposed Development follows the recommended approach as detailed by the Planning Inspectorate (‘PINS’) in PINS Advice Note Seventeen (Planning Inspectorate, 2019). This document summarises the first stages of the CEA approach which include:
- Stage 1 – Establish a Zone of Influence (‘ZOI’) for each environmental discipline and identify long list of ‘other developments’; and
  - Stage 2 – Identify a shortlist of ‘other developments’.
- 1.1.1.7. In order to screen projects for the cumulative effects assessment (‘CEA’) relating to groundwater, the following threshold criteria has been applied:
- The Zone of Influence for other developments has been identified as up to 1 km from the Order Limits.
  - For groundwater the ZOI for other developments is taken as the area directly above the proposed cable route, unless the other developments include for below ground structures i.e. basements, sheet piling, etc. Assumes no below ground structures exist if not included in the planning description.
  - The scale and nature of other developments: projects greater than 0.5 ha, used as a threshold for likely significant effects in Schedule 2 of the EIA Regulations. However, it is also acknowledged that some projects under this threshold may give rise to cumulative effects, so projects within 100 m of the Order Limits are included due to their proximity to the Proposed Development.
  - Temporal scope: construction would need to fall within 1 year of the construction of the proposed Development for cumulative construction effects to need to be considered.
- 1.1.1.8. Table 1 lists the long and short list of developments for consideration as part of the CEA for the Proposed Development.
