Hello,

When is this going to stop and when are we finally going to be listened to and the ludicrous idea of aquind finally put to bed.

The negative effects that this ridiculous “project” will have on our city are never ending and won’t stop once the pipe is laid.

The plan is to come through a beautiful beach, parks, allotments, a nature reserve, CPO houses en route, travel up one of the busiest roads into and off the island which will impact everyone be it living in Portsmouth, visiting Portsmouth and even emergency services needing to get to destinations. Even once laid and completed if there are any issues then the road will need digging up again and again and again.

The company are not trustworthy and have shown their character with the attacks on MP penny mourdant. Donating/ paying the conservatives money does not allow them to destroy our city.

The French government have correctly rejected this and we need to do the same as the benefits would need to outweigh the harm for any project to be accepted and the harm is off the scale for this proposal.

The people of Portsmouth do not want this and will not allow this in our beautiful city.

Please end this nightmare and let us all go back to enjoying our life without the worry of our beautiful city being destroyed before our eyes and our everyday lives being impacted by something we gain nothing from.

Please do the right thing.

Thanks and kind regards

Emma
