Sirs
My reference: AQUI-001
Since the Aquind Project proposal is being re-considered again I wish to re-iterate my objection to this project, along with thousands of other residents of Portsmouth, Havant and Waterlooville, Hampshire and Normandy. There is a strong indication that there is no real need for the proposed AQUIND Project, which is of doubtful viability and undoubtedly routed through one of the least suitable parts of the south coast. There is no justification for the negative impact this project would have on both the civil infrastructure and natural environments from the Solent, the city of Portsmouth and environs to the Meon Valley.
I refer you to my previous communications for more detailed objections.
Yours etc
Patrick A. Whittle
