Dear Council and recipients.

I live in the City and object to the proposal of Aquind. Reducing the city to one bridge will make cycling far more dangerous and can't be sensible if the risks are costed. The already busy traffic will make travel through these roads dangerous.

Churning up old to unearth hundreds of years of chemical, military and agricultural toxic waste without proper testing is not acceptable. In an area with low population that might be acceptable but the risks to so many people is very dangerous. I would consider this dangerous and could not support any proposal of this scale.

Regards  
Justin Vaughan
