Subject: Questions about the feasibility, study for connection at Lovedean

Categories: Consultation Response

Dear Sir/Madam,

I am writing since I am one of the people who is focused on the Aquind application for interconnector and I am a local resident in Portsmouth.

Apart from other reasons why this company should NOT be given permission, there is one specific aspect, which makes me sad: the feasibility study for connection at Lovedean.

I researched the document base of Aquind application and searched in publicly available resources and I cannot find it.

My question is WHY? What are they hiding? Why is the report of this study NOT available for the public if they are so transparent?

I feel like Aquind is playing an unfair game and I feel absolutely misled by information which they provide and hide from us.

Let's stop Aquind, please.

Sincerely,
Maryna Kuzmenko
