Subject: Aquind -OBJECTION

Categories: Consultation Response

Dear PCC,

I wish to submit an objection to the planned Aquind interceptor for the following reasons:

It will unearth hundreds of years of chemical, military and agricultural toxic waste without proper testing and reduce entry and exit to Portsmouth to a single bridge.

It will make Portsmouth not only incredibly hazardous (they want to unearth hundreds, if not thousands of years of chemical, agricultural, military dumping grounds without proper testing) but also reduce the entry/exit points of the island to a single bridge.

Here are some important issues:

1. Bias of inspectors,
2. Problems with planning website hence shattering public confidence in the process
3. The original feasibility study by NG has never been seen by anybody but Aquind (this is the document which decided for Lovedean as connection point)
4. all substations need upgrading and reinforcement work not just Lovedean
5. Mannington alternative, (in NGET and NGESO' s latest document says Mannington is feasible but needs more work).

Kind Regards

Donna Marshall resident PO6 [REDACTED]
