Dear Sir/Madam

I am writing to let you know of my objection to the Aquind Interconnector. This has already been disallowed once and I see even less reason to allow it now with the additional info we have. It will totally disrupt Portsmouth and the surrounding areas for quite some time and for only a tiny percentage of additional power.

France held Jersey hostage to power saying they would cut them off if France did not get the fishing rights they required. Do we really need this?

This has been going on for far too long and the people of Portsmouth deserve to have this resolved.

We do not need or want this interconnector, you must realise how strongly the people feel about this, it is totally unnecessary to have this and the previous decision to disallow it needs to be upheld.

Thank you for reading  
JM Chandler  
Havant.
