Dear Sir/Madam,

I am writing to express my huge concerns regarding the Aquind interconnector, these concerns include the negative effect on our environment in Portsmouth, the huge disruption to wildlife and to trees and plants, we need to look after our precious green spaces in Portsmouth and this interconnector will cause damage and harm to these spaces. It will cause damage and harm to the allotments effecting the people who have allotments there and the important green space that allotments provide.

So many people and parties are united against this project and i am concerned that we are not being listened to and yet its our city which is going to be so negatively effected. I am concerned about the effect on people, we already have traffic problems and this will increase the congestion in Portsmouth adding to pollution problems.

It is not right that this kind of project is being considered for Portsmouth, I ask you to please say No to the Aquind Interconnector,

Yours sincerely

Tracey
