I strongly oppose the Aquind cable laying in portsmouth and its coastline on the grounds of disruption to traffic, effect on wildlife, disruption of local community life, lack of consultation, lack of benefit to local community, the Russian origins/connections in view of the war in Ukraine and the underhand payment to the conservative party and lack of consideration given to alternative options.

Also Portsmouth is one of most densely populated districts in Europe, and any disruption will have dire effect on local life/travel/ impact on journeys requiring more time. Our time is precious and is not to be given away for Russian or commercial gain.

Make Aquind go away.  
It is not welcome in Portsmouth.
