I would like to lodge my formal complaint and objection about aquind.

The route chosen is absolutely ridiculous, disruptive and destructive on an epic scale for not gain. Wildlife, life and businesses will all be forever affected and will recover.

The route can be taken further up the harbour with little or no disruption if deemed absolutely necessary for us to take power this way.

Judging by recent events (Ukraine), where source can be affected, limited, or enormous cost rises have impacted without warning, it makes zero sense to pursue this project.

Yours sincerely
Rebecca Broome
