[You don't often get email from  Learn why this is important at 

I am one of the thousands that have been affected by the partial and then full closure of the Eastern Road in Portsmouth. The problems with southern waters sewer which caused the multiple closures has created total chaos for commuters in Portsmouth and for miles around. Journeys that usually take minutes have literally taken hours because of the road closures. All my family have been affected as they have been late to work or late to appointments. Businesses have suffered because customers have decided against going into Portsmouth because they don't want to get stuck in gridlocked traffic. Just imagine if Aquind get permission to build their interconnector down the Eastern Road - this chaos would become an everyday reality for several years for thousands. We urge you to reject this environmentally damaging project.
