Dear madam,

I am writing today to plead with you in the name of rationality and common sense to please put a stop to this unnecessary and ultimately destructive project.

I have been against this proposed project from the beginning and have stated so in writing to your predecessor and have only grown in my conviction that this is not a beneficial idea for Portsmouth and the surrounding areas and the people of England and will cause untold damage to the already fragile natural environment.

Please stop Aquind

Yours sincerely

Robert Milner
