Dear sir/madam,

Once again I feel compelled to write to you to express my objections to the Aquind Interconnector Project.

I am an allotment holder at the Milton Piece Allotments and the proposed project is planned to destroy many of our allotments.

Portsmouth is suffering from serious car pollution problems at the moment with asthma amongst the youth and elderly on the rise.

To allow this project to go ahead would be depriving Portsmouth of an area of natural importance and significance and would be exacerbating the already serious pollution problem as a result of the pipes having to be laid on the Eastern Rd., one of only two ways into Portsmouth.

This decision has been hanging over our heads for years now and I implore you in the name of common sense, the well-being of the people of Portsmouth and the benefit of the eco-system, to put a stop to it once and for all.

Thank you,

Yours sincerely

Robert Milner
