Subject: OBJECTION TO AQUIND PROJECT
Date: 23 July 2024 16:55:00

You don't often get email from [REDACTED]

Dear Inspector,

I am writing again to object in the strongest possible terms to the Aquind interconnector infrastructure project, due to come to land here in Portsmouth.

I object to these plans for the following reasons:

1) Lack of clarity, overly complicated / technical and ever-changing plans.

Example: Milton allotments weren't part of the formal consultation with the public as an area that could be affected. In the latest plans released by the company this area is now included and they are at risk of being cleared with trees removed and sheds, etc, being knocked down. This is not acceptable, these allotments have been nurtured for many years by Portsmouth residents and are an essential part of their lives. How do we know what else will change from the formal consultation and be trampled over without proper consultation?

2) Lack of quality engagement with the public.

Example: There have been several poorly managed consultations with the public, including letters to residents asking for home owners details and house prices or notices posted so physically low that people did not / could not read them. Aquind have also recently tried to claim that they have the support of local people by using a 3rd party to get a small number of people to complete a misleading survey, which made no reference to Aquind and had no context at all. This is patently not the case as demonstrated by the 6,000 Portsmouth residents who signed a petition against the Aquind scheme, presented to parliament by Stephen Morgan MP.

3) Disruption to the city and potential danger to life

Portsmouth is the second most densely populated city in the country after London and it is an ISLAND with only 3 roads off and on to it. The only accident and emergency hospital department is located on the mainland.

Example: The plans show that one of these roads (Eastern Road) would have lanes closed to traffic. These works would dramatically reduce the access to the city for a considerable period of time, causing huge delays backing up onto the M27 and A3. Not only would this have costs in terms of pollution, time and money but could potentially put lives at risk due to delays getting people to Queen Alexandra Hospital in emergency situations as not A&E on Portsea Island.

4) Environmental impact on the city.

Example: The plans go directly through green spaces, protected areas and areas with specific wildlife protections. Milton common, locks and now Milton and Eastney Allotments. If this goes ahead the effect on wildlife due to increase in pollution/traffic levels of idle vehicles in the surrounding area due to disruption caused by the projects road works will be catastrophic.

I hope you will seriously consider these points I make. My concerns are shared by local councillors and importantly our constituency Member of Parliament, Stephen Morgan MP, who agrees with my points and has been putting pressure on Government to think again about this national infrastructure project. In the recent local elections the MPs who were re-elected or newly elected, Stephen Morgan, Amanda Martin and Suella Braverman, who represent the constituencies directly affected by this proposed project, all oppose Aquind.

Thank you for your time,

Jane Gallagher
