Contents

1.	Arboricultural Impact Assessment (Part 1 of 3)	1
1.1	Introduction	1
	Project overview	2
	Limitations and assumptions	3
1.2	Relevant legislation, planning policy and technical guidance	4
	Legislation	5
	Planning policy	12
	Technical guidance	14
1.3	Consultation and engagement	14
	Overview	14
	EIA Scoping Opinion	16
	Statutory Consultation	18
1.4	Data gathering methodology	18
	Study area	19
	Desk study	20
	Survey work	21
1.5	Overall baseline	21
	Current baseline: overview	22
	Current baseline: Statutory Designations applicable to trees	23
	Current baseline: Non-Statutory Designations applicable to trees	26
	National Tree Map	26
	Future baseline	27
1.6	Embedded environmental measures	31
1.7	Scope of the assessment	31
	The Project	32
1.8	Assessment methodology	35
1.9	Assessment of arboricultural impacts	39
1.10	Conclusions	39

Table 1.1 – Legislation relevant to the arboricultural assessment	4
Table 1.2 – Planning policy relevant to the arboricultural assessment	6
Table 1.3 – Technical guidance relevant to the Arboricultural assessment	12
Table 1.4 – Summary of EIA Scoping Opinion responses for arboriculture	14
Table 1.5 – Summary of statutory consultation responses and technical engagement	17
Table 1.6 – Data sources used to inform the arboricultural assessment	19
Table 1.7 - TPOs located within the Study Area	22
Table 1.8 - Ancient Woodland within the Study Area	24

Table 1.9 - Trees Recorded on the Ancient Tree Inventory within proximity to the Order Limits	26
Table 1.10 – Summary of the embedded environmental measures	27
Table 1.11 - Likely arboricultural impacts	32
Table 1.12 - Canopy Cover/Linear Metres <i>Removed, Affected Managed or Potentially Affected</i>	35
Table 1.13 - Surveyed trees likely to be <i>removed</i>	36
Table 1.14 - Surveyed tree features likely to be <i>Affected/Managed</i>	37
Table 1.15 - Surveyed trees likely to be <i>Potentially Affected</i>	37

Annex 3l.1 Tree Constraints Plan (Part 2 of 3)

Annex 3l.2 Tree Survey Schedule (Part 2 of 3)

Annex 3l.3 Tree Removal and Protection Plan (Part 3 of 3)

Annex 3l.4 Outline Arboricultural Method Statement (Part 3 of 3)

NATIONAL GRID (YORKSHIRE GREEN ENERGY ENABLEMENT PROJECT) ORDER
 5.3.3I ES APPENDIX 3I ARBORICULTURAL IMPACT ASSESSMENT
 ANNEX 3I.1 TREE CONSTRAINTS PLAN

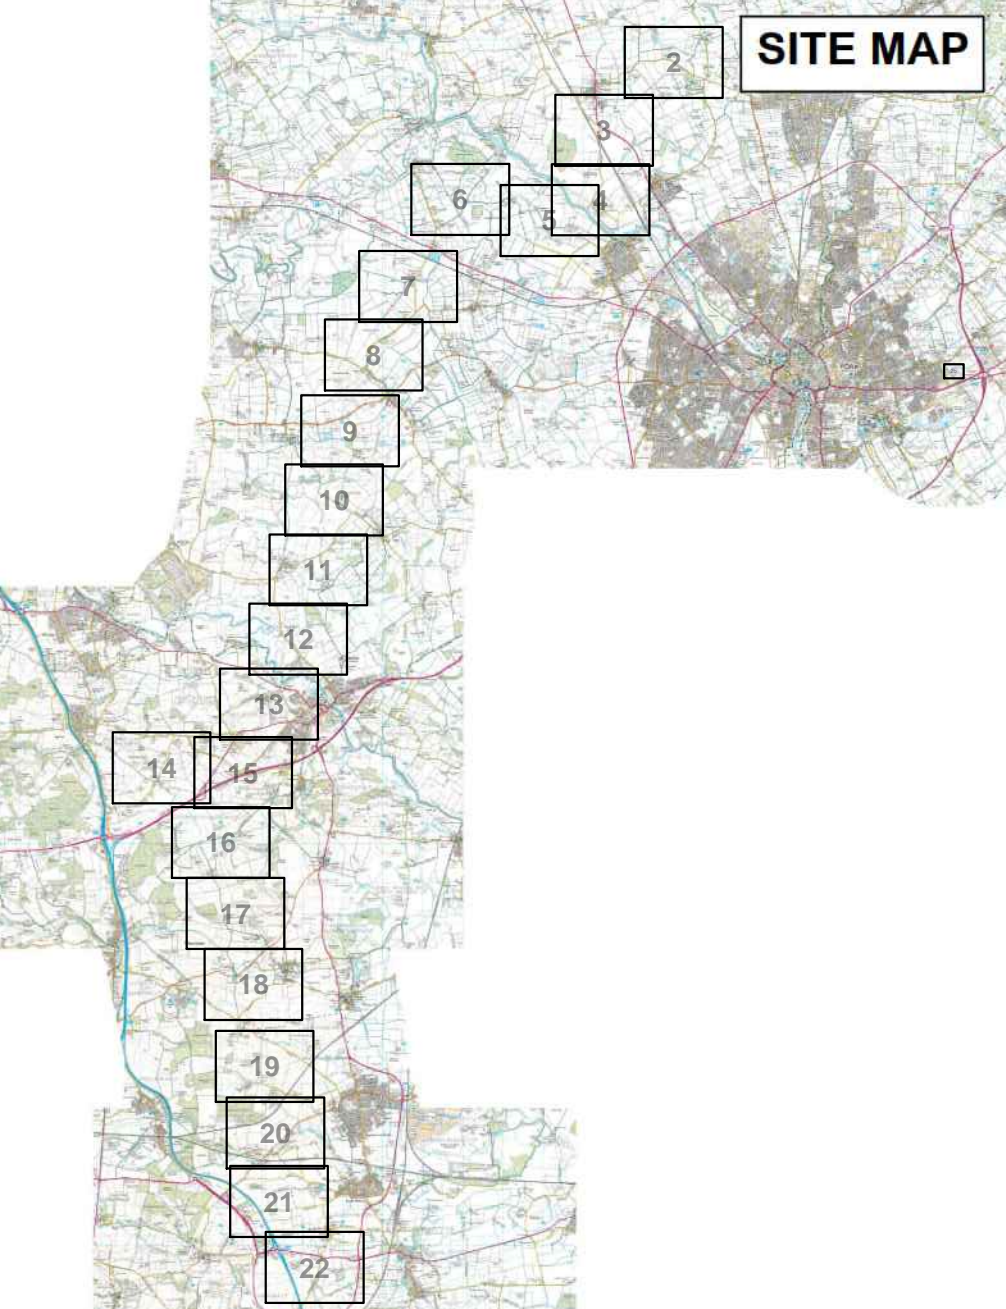

Legend

- ORDER LIMITS
- A CATEGORY TREE, GROUP, HEDGE, OR WOODLAND (HIGH QUALITY & VALUE)
- B CATEGORY TREE, GROUP, HEDGE, OR WOODLAND (MODERATE QUALITY & VALUE)
- C CATEGORY TREE, GROUP, HEDGE, OR WOODLAND (LOW QUALITY & VALUE)
- U CATEGORY TREE, GROUP, HEDGE, OR WOODLAND (UNSUITABLE FOR RETENTION)
- ROOT PROTECTION AREAS (RPA) (AS DEFINED BY BS 9837:2012)
- ★ VETERAN TREE MARKER (INDICATES TREE IDENTIFIED AS THAT OF VETERAN STATUS)
- ADDITIONAL PHASE 1 HEDGEROW SURVEY DATA (TRIMMED TO RELEVANT AREAS)
- NATIONAL TREE MAP DATA (PROVIDED BY BLUESKY INTERNATIONAL LTD)
- ANCIENT WOODLAND W/15M BUFFER ZONE (AREA CLASSIFIED AS AN ANCIENT WOODLAND)
- CONSERVATION AREA (AREA CLASSIFIED AS A CONSERVATION AREA)
- TREE PRESERVATION ORDER (AREA COVERED BY A TREE PRESERVATION ORDER (TPO))

Notes

1. This drawing is scaled at paper size A0, therefore any prints taken at smaller sizes will affect accuracy of the measurement units and should not be scaled against.
2. Tree categories as defined by BS 5837:2012
3. Tree locations are based on the os mapping, aerial imagery, National Tree Map data (BlueSky International Ltd), and gps co-ordinates from on site walkover.
4. Plans should be read in conjunction with the Arboricultural Impact Assessment.
5. The original of this drawing was produced in colour - a monochrome copy should not be relied upon.

Coordinate System: British National Grid
 Sheet X Centroid Coordinate: 452828 Sheet Y Centroid Coordinate: 444453

BACKGROUND MAPPING INFORMATION HAS BEEN REPRODUCED FROM THE ORDNANCE SURVEY BY PERMISSION OF ORDNANCE SURVEY OF THE CONTROLLER OF HER MAJESTY'S STATIONERY OFFICE. CROWN COPYRIGHT ORDNANCE SURVEY, BLUESKY INTERNATIONAL LTD - NATIONAL GRID ELECTRICITY - 100024241.

Tree Survey Schedule

Page intentionally blank

Key to abbreviations used in the survey

Ref No	Specific identification number given to each tree or group. T=Tree/H=Hedge/G=Group,/W=Woodland	
Species	Common name followed by botanical name shown in italics	
RPA	Root Protection Area (As defined by BS5837)	
Stem diameter (DBH)	Diameter of main stem (DBH), measured in millimetres at 1.5m above ground level. (MS = Multi-stem tree measured in accordance with BS5837 Annexe C)	Av/Average: indicates an average representative measured dimension for the group or feature
Spread	The width and breadth of the crown. Estimated on the four compass points in metres.	
Crown clearance	The estimated height (in metres) above ground level of the lowest significant branch attachments.	
#	Estimated dimensions	
*	Indicates estimated position of tree (not indicated on topographical survey).	
Category	Categorisation of the quality and benefits of trees on Site as per Table 1 and 2 of BS5837:2012. 1=Arboricultural quality/value 2=Landscape quality/value 3=Cultural quality/value (including conservation)	
	A=High quality/value 40yrs+ (light green). B=Moderate quality/value 20yrs+ (mid blue) C=Low quality/value min 10yrs/stem diameter less than 150mm (grey). U=Unsuitable for retention (dark red).	
Life stage	Young (Y): Newly planted tree 0-10 years. Semi-Mature (SM): Tree in the first third of its normal life expectancy for the species (significant potential for future growth in size). Early Mature (EM): Tree in the second third of its normal life expectancy for the species (some potential for future growth in size) Mature (M): Tree in the final third of its normal life expectancy for the species (having typically reached its approximate ultimate size). Over Mature (OM): Tree beyond the normal life expectancy for the species. Veteran (V): Tree which is of interest biologically, aesthetically or culturally because of its condition, size or age. Ancient (A): Tree which is old or aged and has survived well beyond the typical life span for the species.	

Structural condition	<p>Good: No significant structural defects</p> <p>Fair: Structural defects which can be resolved via remedial works.</p> <p>Poor: Structural defects which cannot be resolved via remedial works.</p> <p>Dead: Dead.</p>
Physiological condition	<p>Good: Normal vitality including leaf size, bud growth, density of crown and wound wood development.</p> <p>Fair: Lower than normal vitality, reduced bud development, reduced crown density, reduced response to wounds.</p> <p>Poor: Low vitality, low development and distribution of buds, discoloured leaves, low crown density, little extension growth for the species.</p> <p>Dead: Dead</p> <p>Fair/Good = Indicates an intermediate condition</p> <p>Fair – Good = Indicates a range of conditions (e.g. within a group)</p>
Preliminary management recommendations	<p>Works identified during the tree survey as part of sound arboricultural management, based on the current context of the Site (where relevant reference has been made to tree management based on the potential future context of the site).</p>
Works to facilitate the development	<p>Tree works identified as necessary to facilitate the Proposed Development following a desk top analysis of the proposals in relation to tree constraints.</p>
Impact Type	<p>Colour coding to denote the different classes of impact for tree features (definitions of impact classes are included within the Arboricultural Impact Assessment Report).</p>
	<p>Removed Affected/Managed Potentially Affected Unaffected</p>

Tree ID	Species	Estimated Height (m)	Stem Diameter (mm)	Canopy Spread (N)	Canopy Spread (S)	Canopy Spread (E)	Canopy Spread (W)	First Significant Branch (m)	Canopy Clearance (m)	Physiological Condition	Life Stage	Structural Condition	Condition Comments	Preliminary Management Comments	Individual Tree Impacts	Group Contains Not Affected	Group Contains Potentially Affected	Group Contains Affected Managed	Group Contains Removed	Estimated Remaining Contribution (years)	BS5837 Quality Category	Root Protection Area (m ²)
T1*	Horse Chestnut (<i>Aesculus hippocastanum</i>)	11	300	4	4.5	4.5	4	2.0/W	2	Fair	SM	Good	Ivy growth on trunk encroaching lower crown. Horse chestnut leaf minor present. Minor wounds on eastern limb. Orbicular form. High crown clearance on northern side. No access to base.	Remove ivy. (When funds allow)	Not Affected	N/A	N/A	N/A	N/A	20+	B1,2	40.7
T2*	Norway Maple (<i>Acer platanoides</i>)	12	450	5	5	4	4.5	2.0/S	1	Good	EM	Good	High crown on roadside due to previous pruning. Crown containing dead wood. Large, heavy southern limb. Wound on lower stem with occluding growth. Small galls present at lower branch union. No access to base.	Remove dead wood over roadway. (< 12 months)	Not Affected	N/A	N/A	N/A	N/A	20+	B2	91.57
T3*	Common Oak (<i>Quercus robur</i>)	6	150	2	2	1	2	3.0/E	1.5	Fair	Y	Fair	Suppressed southern crown due to adjacent tree. Minor specimen that is easily replaceable. Dead branches in lower crown due to shaded conditions. No access to base.		Not Affected	N/A	N/A	N/A	N/A	10+	C1	10.17
T4*	Common Oak (<i>Quercus robur</i>)	7	200	4	4	4	4	1.5/S	0.5	Fair	SM	Good	One sided crown due to previous roadside pruning works. Developing included union with no signs of current natural bracing. No access to base.		Not Affected	N/A	N/A	N/A	N/A	20+	B1,2	18.09
T5*	Norway Maple (<i>Acer platanoides</i>)	12	420	5	6	4	5	2.5/S	1.25	Good	SM	Fair	High crown on roadside due to previous pruning. Crown contains minor dead wood. Included union with no natural bracing present above. No access to base.		Not Affected	N/A	N/A	N/A	N/A	20+	B1,2	79.77
