

We would request that the area of works number 8 south of Tadcaster is considered for a site visit. In particular to take into consideration the proposed extinguishment of Mr Watson's right of way as it is not considered that this is completely necessary by my client. We would also request that the areas of compulsory acquisition which have been identified on the land plans (D1-33) as the proposed acquisition will remove the majority of my client's road frontage ownership and the principle access to the field. It is considered that if the acquisition and the extinguishment both proceed as planned my client would not be in control of any access into the field. Whilst we assume appropriate access rights would be granted by the acquiring authority it would not be satisfactory for Mr Watson to have lost control of the access.

Access should be arranged by contacting Gillian Wilsher or Philip Watson.
