1. About this document

1.1 Introduction

- 1.1.1 This document has been produced further to an action arising from Issue Specific Hearing 1, which was held on 23 March 2023 **[EV-003a]**.
- 1.1.2 A flowchart has been prepared by National Grid Electricity Transmission Plc (National Grid) (the Applicant) to summarise the plans relating to the Yorkshire Green Energy Enablement (GREEN) Project (referred to as the Project or Yorkshire GREEN) secured through the Requirements of the **draft Development Consent Order (DCO) (Document 3.1(B)) [AS-011]**.
- 1.1.3 The flowchart included in this document identifies the relevant requirement to which each plan relates and the nature of the plan in question. The categories given to each plan identifies its status as either:
- Documents that have been submitted as part of the application and will be revised during examination (if required) and finalised as a certified document under the DCO; or
 - Documents to be drafted and finalised post examination.
- 1.1.4 Arrowed lines show how each requirement connects to a plan and also how certain plans connect together. A firm line shows where a plan must be in accordance with the connected plan. A dashed line shows where a certified plan contains elements relating to a future plan, which are already secured (such as the **Code of Construction Practice (Document 5.3.3B) [APP-095]**).
