ENERGY ENABLEMENT PROJECT)**

PLANNING INSPECTORATE REFERENCE: EN020024

NOTICE IS HEREBY GIVEN that, at the dates, times and locations set out below, one compulsory acquisition hearing and one issue specific hearing will be held by the Examining Authority (appointed by the Secretary of State) for the examination of the application made by National Grid Electricity Transmission plc (company number 02366977) ("the Applicant") for a Development Consent Order ("the DCO") for the National Grid (Yorkshire Green Energy Enablement Project) ("the Application").

The Application was made to the Secretary of State (via the Planning Inspectorate) under sections 14(1)(b), 16 and 37 of the Planning Act 2008 on 15 November 2022 and was accepted by the Planning Inspectorate for examination on 08 December 2022. The Application has been given the Planning Inspectorate reference number **EN020024**.

SUMMARY OF THE PROJECT

The National Grid Yorkshire Green Energy Enablement Project ("the Project"), is a Nationally Significant Infrastructure Project ("NSIP").

The Applicant is proposing to upgrade and reinforce the electricity transmission system in Yorkshire. This reinforcement is needed to improve the transfer of clean energy across the country. It will support the Government's commitment to quadruple the UK's offshore wind capacity by 2030. It will also support growth in this source of green energy in Scotland and the north-east of England by providing the capability to efficiently manage substantially increased power flows in Great Britain and increased energy demand, which the Climate Change Committee predicts will double by 2050.

The Project will comprise of a new substation at Overton ("Overton Substation"), cable sealing end compounds ("CSECs") and new overhead lines connecting into Overton substation (including a 2.8km 400kV overhead line and two 275kV overhead lines 1.5 - 2.1km in length). Also included in the Project is removal of existing 275kV overhead line, realignment and refurbishments of existing overhead line within the areas of North West of York, Poppleton, Tadcaster and Monk Fryston. Two new CSECs are proposed at Tadcaster, along with a new substation at Monk Fryston, and realignment of 275kV and 400kV overhead lines in this location. The Proposed Development will also include other associated works at the existing Osbaldwick Substation.

The Project is sited within Yorkshire, routed from the most northerly components of the Project located approximately 1.5km north-east of the village of Shipton-by-Beningbrough and approximately 10km north-west of York city centre, to the most southerly components at Monk Fryston Substation, located to the east of the A1 and immediately south of the A63. The Project would also be routed via the Tadcaster area, located approximately 3km south-

west of Tadcaster and to the north-east of the A64/A659 junction, where new components of infrastructure would also be proposed.

A map showing the location of the Project can be viewed online on the Yorkshire Green page of the Planning Inspectorate's National Infrastructure Planning website at:

<https://infrastructure.planninginspectorate.gov.uk/wp-content/ipc/uploads/projects/EN020024/EN020024-000302-2.1%20Overall%20Location%20Plan.pdf>

The Project would make provision for Associated Development for the construction and maintenance of the NSIP, including the diversion of utilities and public rights of way, provision for access, landscaping works and environmental mitigation. Development consent is required to the extent that development is or forms part of a nationally significant infrastructure project pursuant to sections 14(1)(b) and 16 of the Planning Act 2008, as it forms the installation of an electric line above ground which will be wholly within England, of a nominal voltage greater than 132 kilovolts and longer than two kilometres. It is for this reason that the Project falls within the remit of the Secretary of State's decision making powers.

The DCO would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Project. The DCO would also authorise the construction of temporary and permanent accesses to the Project, the temporary stopping up or diversion of public rights of way, street works and highway works, and the application and disapplication of certain legislation.

HEARINGS

NOTICE IS HEREBY GIVEN in accordance with Sections 91, 92 and 94 of the Planning Act 2008 and Rule 13(6) of the Infrastructure Planning (Examination Procedure) Rules 2010 that hearings are due to be held by the Examining Authority for the Examination of the Application at the dates and times set out in the table below:

Date	Hearing Type	Time	Joining Details
