For the last twenty years I have developed the land at Pear Tree Farm as a nature reserve. Wild life and birds have been encouraged, no fertilizer has been used and natural flowers have been allowed to establish themselves on the land. All this will be destroyed if the gas storage facility passes through the middle of the site. This is probably the only area of land to be kept in this way in this part of the Fylde, other than Winmarleigh moss. Therefore I wish to express my opposition to the proposals which will destroy twenty years of conservation and the creation of a unique wild heritage site

James Houghton
