To Mr. Paul Hudson,
Lead Examining Inspector
National Infrastructure Directorate

Dear Sir,

Mr. William Bashall telephoned me on Tuesday 23rd October 2012 to ask if I would e-mail to him a copy of my objection, which I agreed to do on the proviso he e-mailed me in return a copy of his response which he did. I am aware that I am unable to raise any further objections at this late stage but feel the need to ask you do something for me.

When reading the response I would ask that you question why it was that my husband and myself on the advice of our land agent Mr. Richard Cornish of Ingham and Yorke, Clitheroe, a man of integrity and many years experience of land and tenancy matters, declined the 'generous compensation package' offered by Mr. Bashall on behalf of Halite. It is not that Mr. Bashall has told you an untruth so much that he has not told you the whole truth. A matter of such concern to our agent that he intends to take issue on a personal basis with Mr. Bashall.

And, in order to reach our land on the south side of Monks Lane, yes we could through the gate on Aggleby's Lane which is the gate of access to the land on the 12 months FBT.

Thank you.

Mrs. Janet Whitlow

Dear Mr Carpen,

Further to my earlier call with Chris White, please see attached letter and certificate issued by DCLG under sections 131 & 132 Planning Act 2008. We are in the process of advertising the notice of the certificate as requested by DCLG. This completes the process in respect of Halite’s application for a certificate in respect of the open space land. I understand that PINS will forward the certificate to the appropriate team at DECC.

I would be grateful if you could kindly acknowledge receipt.

Please let me know if you require any further information.

Yours sincerely

Paul Grace

Our Ref: LDN/023/Q2371/009/0001  
Your Ref: LSG4/CH2/5.41978  

4 February 2013  

Dear Sir  

HALITE ENERGY GROUP  
APPLICATION UNDER SECTIONS 131(3) AND 132(2) OF THE PLANNING ACT 2008  
IN CONNECTION WITH THE PROPOSED DEVELOPMENT CONSENT ORDER FOR  
AN UNDERGROUND FACILITY AT PREESALL, LANCASHIRE  

I refer to the above application and enclose the Secretary of State for Communities and  
Local Government’s signed certificate, which is given under Sections 131(3) and 132(2) of  
the Planning Act 2008.  

You should now proceed in accordance with sections 131(10) and 132 (10) of the  
Planning Act 2008 to publish, in the same local newspaper(s) as the notice of intention to  
give the certificate was published, the attached notice in the prescribed form, stating that  
the certificate has been given.  

Please send to me a copy of each newspaper or of the pages from each newspaper,  
containing the public notices as soon as possible.  

This letter supersedes and replaces our letter of 19 December.  

Yours faithfully  

JEAN NOWAK
CERTIFICATE UNDER SECTIONS 131(3) & 132(2) OF PLANNING ACT 2008

IN CONNECTION WITH

THE PROPOSED PREESTALL (UNDERGROUND GAS STORAGE FACILITY) DEVELOPMENT CONSENT ORDER (THE “ORDER”)

The Secretary of State for Communities and Local Government in exercise of his powers under sections 131(3) and 132(2) of the Planning Act 2008 certifies that he is satisfied:

(i) that the open space land described in Schedule 1 below does not exceed 200 square metres in extent and that the giving in exchange of other land is unnecessary, whether in the interests of the persons, if any, entitled to rights of common or other rights or in the interests of the public; and

(ii) that the open space land described in Schedule 2 below, when burdened with the rights authorised to be compulsorily acquired under the Order, will be no less advantageous than it was before to the persons in whom it is vested, other persons, if any, entitled to rights of common or other rights, and the public.

Schedule 1

British Land Registry
Jean Nowak
Department for Communities and Local Government  Date: 04 February 2013
PUBLIC NOTICE THAT A CERTIFICATE HAS BEEN GIVEN UNDER SECTIONS 131 AND 132 OF THE PLANNING ACT 2008 ("2008 ACT")

IN CONNECTION WITH

THE PROPOSED PREESALL (UNDERGROUND GAS STORAGE FACILITY) DEVELOPMENT CONSENT ORDER

Halite Energy Group Limited ("Halite") made an application under the 2008 Act for a Development Consent Order ("DCO") for an underground gas storage facility at Preesall, Lancashire ("the Development").

The DCO, amongst other things, includes provision for the compulsory acquisition of all interests in two parcels of land totalling 154 square metres of land for an observation platform (see Schedule 1 below) and rights over 10 parcels of land covering a total of 36,310 square metres for the purposes of the brine outfall pipeline and the electric cable comprised in the Development being kept and supported once installed, access, maintenance, surveying and the removal of vegetation or new buildings located over authorised works (see Schedule 2 below). Full descriptions and plans of these parcels of land and the relevant rights can be found in the Book of Reference and Land Plan available for viewing at Wyre Borough Council, Civic Centre, Breck Road, Poulton-le-Fylde, Lancashire FY6 7PU.

Included within the land to be acquired compulsorily in Schedule 1 is open space land; included within the rights to be acquired compulsorily over land in Schedule 2 are rights over open space land.

An order granting development consent is subject to special parliamentary procedure, to the extent that the order authorises the compulsory acquisition of (a) land forming part of open space and (b) a right over land forming part of open space by the creation of a new right over such land, unless the Secretary of State for Communities and Local Government ("the Secretary of State") gives a certificate in accordance with the provisions of sections 131 and 132 of the 2008 Act.

Pursuant to an application made by Halite, the Secretary of State in exercise of his powers under sections 131(3) and 132(2) of the 2008 Act gave a certificate (the "Certificate") on 4 February 2013 that he is satisfied:

(i) that the open space land described in Schedule 1 below does not exceed 200 square metres in extent and that the giving in exchange of other land is unnecessary, whether in the interests of the persons, if any, entitled to rights of common or other rights or in the interests of the public; and

(ii) that the open space land described in Schedule 2 below, when burdened with the rights authorised to be compulsorily acquired under the DCO, will be no less advantageous than it was before to the persons in whom it is vested, other persons, if any, entitled to rights of common or other rights, and the public.
The Secretary of State has directed Halite to give notice that the Certificate has been given. Halite hereby gives that notice.

Date:  
Berwin Leighton Paisner LLP (solicitors to Halite Energy Group Limited)
Greg Barker MP
Minister of State
Department of Energy and Climate Change
3 Whitehall Place
London, SW1A 2HH

4th March 2013

Dear Greg,

RE: Preesall Saltfield Underground Gas Storage by Halite Energy Group Ltd

I wanted to take the opportunity to write to you regarding the issue of Halite Energy Group's proposal to construct an underground gas storage facility in Preesall; as you will be aware this is of great concern to myself and fellow MPs on the Fylde Coast. I know that my colleague Eric Ollershaw MP has attempted to set up a meeting with you via your private office to discuss our concerns in person but to date this has proved unsuccessful.

The proposals have caused a great degree of concern to my constituents and those in neighboring constituencies on the Fylde Coast. Having already contributed to the consultation I wanted to expound on the primary concerns residents have in a bit more depth.

There have been three previous applications to store vast quantities of gas at great pressure in caverns under the Wyre Estuary. On those previous occasions an average of 10,000 residents wrote letters opposing the scheme during consultations. This is now the fourth time a similar proposal has been put forward and there is equal discontent, primarily because the basis on which the previous proposals were rejected has not changed - the unsuitable geology of the Preesall site. At 300m the proposed underground gas storage scheme is extremely shallow. There is a risk of gas migration into the porous sandstone bed which underlies Fleetwood, and the network of old brine wells and salt mines where for one hundred years ICI have placed water down shafts and pumped up dissolved salt. This area of salt is riddled with huge holes resulting in the ground collapsing over much of the area.

In addition to the geology there are concerns regarding ecological damage from discharge of the brine at Rossall. Potentially up to 50 million tonnes of saturated brine, the result of washing out the caverns, will be dumped into the sea with adverse effects on the sea bed life and fisheries. Also, the Wyre estuary is an important internationally recognised wild life area given special protection because of its bird life and salt marshes. The caverns would be created under these marshes and as consequence threaten the area. Constituents have also stressed to me the proposal would lead to the industrialization of the landscape alongside the Wyre Way, which is part of the Lancashire Coastal Path. The recreational use of the landscape will suffer as a consequence.

I am sure large numbers of residents will have raised these issues via the consultation, but I wanted to formally express my opposition on their behalf to what is another attempt at foisting underground gas storage on the community. The proposal is riddled with flaws and I would urge this to be at the forefront of your mind as the proposal is considered.

Yours sincerely,

PM/AB

Email: paul.maynard.mp@parliament.uk
Dear Mr. Davey

Re: The Halite proposal, including Gas Storage at Freesall, Lancashire

I write regarding the above, which I believe you will be giving your judgment upon in the next few weeks.

As somebody who is vehemently opposed to the proposal, I am asking you to please give due consideration to the following details and consequences should the Halite proposal be given the green light:

- The geology of the site is extremely unsafe. This is not just a recently stated assertion; on the contrary, this has been accepted as true going back many decades. To store gas in such circumstances would be tantamount to madness, considering the appreciable risk of gas migration. With Fracking taking place a few miles away, the same Fracking which caused an earthquake in nearby Poulton le Fylde in 2011, this could cause the salt caverns where the gas is to be stored to collapse. There is a large population within a few miles, on both sides of the River Wyre, who need to be considered.

- Much of the construction traffic would use the A588 road, widely regarded as one of the most dangerous in the country. This road's capacity reached saturation-point long ago and for more heavy-goods vehicles to be given permission to use it, would make it more dangerous than ever. This would again negatively impinge on the lives of many people.

- The roads that would have to be used to access the brine-wells and salt-caverns from the A588 are single-track, country lanes, used predominantly by the thriving local farming community. If it inconceivable how the heavy-goods vehicles and plant machinery can access the site without there being serious disruption and permanent destruction of hedgerows and farming land.

- Environmental considerations. Where Halite propose to store gas is part of the Wyre Way and part of the Wyre Estuary Site of Special Scientific Interest. These are vital stopping-off points for many migrating birds and a wonderful amenity for walkers and birdwatchers.
  - Halite proposes to build an insidious pipeline from the Freesall side of the River Wyre over to Rossall, near Fleetwood. This would be for the express purpose to pump highly-concentrated brine from the salt caverns into the Irish Sea, resulting in negative-effects
on the local marine life. I fail to see how a dubious application to meet an energy-storage solution should in fact have a destructive effect on the local environment.

- Halite/Canatx. They have demonstrated complete disregard for the local population in their continued applications for their gas storage plans. These applications have been rejected time and again by due process but still they come back with the same proposals, but under a new name: Halite. They have unsuccessfully attempted to wear down the local population and the Protect Wyre group, who have done so much in taking the fight to Halite/Canatx. The truth being that Halite/Canatx have held the land at Preesall for many years and are scared of being encumbered with land that they cannot use and will find almost impossible to sell. In my opinion, this is the reason behind their continued applications for gas storage.

- The strength of local feeling. This is not a classic case of a few NIMBYs who are against change for changes' sake. Having weighed up all the issues, over ten thousand individuals have put on record their opposition to the proposals. Please be assured Mr. Davey: should this proposal be given the go ahead, it would signal the end of life as people know it in the area known as Over Wyre. This is an area where people move to for the quality of life, the countryside, the close proximity to the River Wyre and the availability of nature to commune with. Whilst all who have objected to this proposal will agree that alternative energy-production and storage are needed to meet the demands of the twenty-first century, this proposal would destroy the local environment and lives of many residents, permanently.

I respectfully ask you to reject this proposal from Halite and should you be in any doubts about any of the points I have raised, I suggest a visit to the site at Preesall by yourself to see the geography of the area and to meet with the Protect Wyre group. Our local MP, Ben Wallace, has shown staunch opposition to the proposal; he quite literally knows the lie of the land.

Yours sincerely

Mr. Charles Bowman
Rt Hon Gregory Barker MP  
Minister of State for Climate Change  
Department for Energy and Climate Change  
3 Whitehall Place  
London

8th March

Dear Mr Barker,

DIETER HELM REPORT ON GAS STORAGE

We would like to share with you the recent report on the future of Gas Storage in the UK by Dieter Helm, Professor of Energy Policy at the University of Oxford.

The report echoes calls from both Government and the Energy and Climate Change Select Committee that gas plays a significant role in Britain's future energy mix and that gas storage facilities need to be significantly increased over the next two decades to maintain security of supply.

The report identifies that:

- Britain's fortunate position as a gas exporter has been transformed to one of import dependency. This new reality is unlikely to be changed by shale gas for a considerable time, if ever.
- Increased renewables have rendered the energy market less secure, and in turn made gas Combined Cycle Gas Turbines intermittent. Renewables are therefore increasing the volatility of the system.
- The gap between current provision and a range of possible optimal levels is very large – and that is what matters for policy. There is therefore little doubt that considerable investment in storage is required.
- There are several mechanisms to ensure storage is increased. Given that Energy Market Reform (EMR) will introduce a capacity market, and the system operator will have to ensure security of supply, storage should be incorporated into the EMR reforms.
- There is considerable urgency, given the time lag in bringing significant new storage facilities onto the system.

Following the recent announcement from Ofgem that British energy reserves are increasingly becoming "uncomfortably tight", we believe that energy security is one of the major challenges facing the UK. Our home-produced oil and gas supplies are well past their peak and by 2025 we will be forced to import 75 per cent of all our gas needs.

The UK's current storage capacity of 14 days has come dangerously close to being exhausted in recent winters, a situation which will deteriorate further if action is not taken immediately. This lack of flexibility will become sharper as the share of gas supplied from our own reserves continues to fall, preventing the UK increasing production to meet extra demand.

We believe the findings of the report build on evidence currently available which highlights the key role of gas in delivering energy security.

If you have any questions please do get in touch with us.

Best Wishes

Keith Budinger

13TH BIRTHDAY

Sophie Olivia Richmond
Teenager at last!
Best wishes on your 13th birthday!
Lots of love from all the family

50TH BIRTHDAY

50 50 50 50 50 50 50 50 50 50 50 50

WEBSTER STEPHEN
Wishing you all the best on your 50th Birthday and always.
Mum and Dad.

THANK YOU

Thank You

To my family for such a wonderful birthday and my many friends who sent me such lovely cards and presents.
God Bless you all
Carole Houghton

DEATHS

SMITH SHELLEY
Passed away peacefully on 8th February 2013, at Royal Preston Hospital after a long illness, aged 58 years.
Loving wife of Stephen, devoted sister and much loved auntie.

Funeral service and committal on Friday 22nd February 2013, at 10.15 a.m. at Lancaster and Morecambe Crematorium. Family flowers only.
Donations if desired for Lupus UK.

Enquiries to L. Stewart, Di mond & Son, 2 Bridge Street, Garstang, PR3 1YB.
Tel 01995 602316

ANNOUNCEMENTS

PUBLIC NOTICES

PUBLIC NOTICE THAT A CERTIFICATE HAS BEEN GIVEN UNDER SECTIONS 131 AND 132 OF THE PLANNING ACT 2008 (“2008 ACT”) IN CONNECTION WITH THE PROPOSED PRESSEAL (UNDERGROUND GAS STORAGE FACILITY) DEVELOPMENT CONSENT ORDER

Halite Energy Group Limited (“Halite”) made an application under the 2008 Act for a Development Consent Order (“DCO”) for an underground gas storage facility at Presseal, Lancashire (“the Development”).

The DCO, amongst other things, includes provision for the compulsory acquisition of all interests in two parcels of land totalling 154 square metres of land for an observation platform (see Schedule 1 below) and rights over 10 parcels of land covering a total of 36,310 square metres for the purposes of the brine outfall pipeline and the electric cable comprising in the Development being kept and supported once installed, access, maintenance, surveying and the removal of vegetation or new buildings located over authorised works (see Schedule 2 below). Full descriptions and plans of these parcels of land and the relevant rights can be found in the Book of Reference and Land Plan available for viewing at Wyre Borough Council, Civic Centre, Brock Road, Poulton-le-Fylde, Lancashire FY6 7PU.

Included within the land to be acquired compulsorily in Schedule 1 is open space land, included within the rights to be acquired compulsorily over land in Schedule 2 are rights over open space land.

An order granting development consent is subject to special parliamentary procedure, to the extent that the order authorises the compulsory acquisition of (a) land forming part of open space and (b) a right over land forming part of open space by the creation of a new right over such land, unless the Secretary of State for Communities and Local Government (“the Secretary of State”) gives a certificate in accordance with the provisions of sections 131 and 132 of the 2008 Act.

Pursuant to an application made by Halite, the Secretary of State in exercise of his powers under sections 131(3) and 132(2) of the 2008 Act gave a certificate (the “Certificate”) on 4 February 2013 that he is satisfied:

(i) that the open space land described in Schedule 1 below does not exceed 200 square metres in extent and that the giving in exchange of other land is unnecessary, whether in the interests of the persons, if any, entitled to rights of common or other rights or in the interests of the public; and

(ii) that the open space land described in Schedule 2 below, when burdened with the rights authorised to be compulsorily acquired under the DCO, will be no less advantageous than it was before to the persons in whom it is vested, other persons, if any, entitled to rights of common or other rights, and the public.

The Secretary of State has directed Halite to give notice that the Certificate has been given. Halite hereby gives that notice.

Schedule 1

Land to be acquired under the DCO for construction of an observation platform.

<table>
<thead>
<tr>
<th>Plot Number</th>
<th>Description</th>
<th>Area (square metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>9</td>
<td>Foreshore comprising shingle beach and sloping masonry (open space), situated west of Marine Parade promenade and junction of West Way and Fairway</td>
