Dear Mr Scott,

Having lived in Preesall all my life I feel I must write to you in support of the proposal to store gas underground in the local salt field.

Storing gas in purpose built salt caverns is a well accepted practice all over the world. Besides ensuring continuity of supply it will also create much needed jobs in the area and a welcome boost to local businesses, shops, etc.

I have absolutely no concern as to the safety of the project as our Health and Safety in this country is second to none. As our energy needs grow we have to do something to guarantee continuity of supply and this project would go a long way towards this.

Yours Sincerely,

Peter Taylor
