Sir,

Re Preesall underground gas storage facility.

We are writing once again to object to this proposal. We vehemently oppose this project and have done from day one. This proposal has been going on for 18 years, and along with many other thousands of residents, feel it is about time that it was kicked into the long grass permanently. Geologically this land is unsafe for any form of development. In the time we have lived here the ground has subsided overnight, leaving large holes which have had to be fenced off. In America developments on this scale are not allowed within three miles of centres of population. We deserve the same respect. During this long period Cantxx/Halite have treated the residents with complete disdain. At times we have been accused of sabotage, which was then proved to be age of equipment. We feel that the amount of traffic that this project would generate would be unsustainable on our narrow lanes. One last point apart from the considerations of the wildlife and our environment, would the Secretary of State be comfortable in allowing this type of installation within 3 to 4 miles of a major centre for fracking, which has already caused minor tremors in this area. The Minister may care to research the Abbeystead disaster of several years ago which was caused by a build up of underground gas. We ask you to save our homes and environment for the next generation.

Yours Faithfully,

Lesley and Michael Jeynes. [REDACTED]
