Subject: Letter of Support - Halite Energy Group

Dear Mr Scott

I write to offer my wholehearted support for the proposed Preesall facility application by Halite Energy Group in Lancashire.

I am very much aware of the importance of the Preesall facility as an asset to the nation and of the significant positive impact it would have on local employment and the local economy.

I consider that there is an overwhelming case in support of the development consent order being approved; not only are there very sound local economic reasons for approving the application there is also a strong national case for approval.

Halite energy Group's application at Preesall is of strategic importance to the UK's economy and I am sure that due consideration will be given to that fact when the application is considered.

Best Wishes

Damian Waters
