**Subject:** NTS connection for Keuper Gas Storage Project

Hello,

I'm contacting you on behalf of National Grid Gas Transmission. I recently received an enquiry regarding the DCO for this project and I was hoping somebody could provide me with some more information regarding the connection to the NTS.

Apologies if this has already been discussed with National Grid but this project isn't one that I've been made aware of before. I will be able to pass the contact details onto the relevant person within our gas connections team.

Many thanks,

**Philip Booth**
