

Willington Gas Pipeline

Telephone conference with RWE npower ,18 October 2012, 10am

RWE: Hugh Morris, Helen Burley

PINS: Simone Wilding, Stella Perrett

This was a brief telephone conference to answer RWE's queries regarding finalising their application documents.

RWE have now included plain English names in their electronic document index.

PINS suggested they also include plain English names in the file names of Chapters and Appendices.

RWE have produced an additional Document Reference list separate from the electronic index for publication on the web-site.

There was a discussion about method of paying the initial fee, PINS will check this and get back to them.

RWE said they are still aiming to submit their Application by late November.

PINS advised RWE to look at the annexe of Advice Note 14 which shows a template which could be used for the Consultation Report. PINS recognised, however, that it may be too late for RWE to make fundamental changes to the consultation report. PINS advised to ensure that the information highlighted by the template is provided in the consultation report.
