4 March 2016

Dear Mr Aston,

Application by National Grid Gas plc for the River Humber Gas Pipeline Replacement Project – deadline 9

Thank you for your letter dated 26th February setting out the Examining Authority's request for further information. Please find enclosed a response on behalf of Anglian Water.

Question 11: Are the archaeological mitigation works now proposed in Areas A-D part of the ongoing negotiations with the Applicant [REP7-007]? Are there any matters you wish to raise with the ExA?

There are assets in the ownership of Anglian Water in the vicinity of the proposed archaeological works. Anglian Water has not had any negotiations with the applicant regarding the proposed works outlined in the archaeological strategy. However we expect to have further discussions with the applicant regarding this issue.

It is important that the any proposed works take place outside of the standard easement widths for Anglian Water's assets as outlined in our relevant representations (document RR-01). In addition when working near Anglian Water's apparatus no heavy equipment should be tracked, placed on or used along Anglian Water's assets to avoid possible damage to these assets.

Any requests by the applicant for alteration or removal of Anglian Water's assets would need to be conducted in accordance with the Water Industry Act 1991.

Should you have any queries relating to this response please let me know.

Yours sincerely
