1.1 Construction.....	1
1.2 Operation.....	434

Appendix 9.4 Potential Effects on the Historic Environment

1.1 Construction

- 1.1.1 Potential effects on the historic environment during construction have been assessed in the absence of the Archaeological Mitigation Strategy (AMS) (Appendix 9.5) and other good practice measures. Good practice measures are set out in the Register of Environmental Actions and Commitments (REAC) (Chapter 16 Environmental Management and Mitigation) and secured through Development Consent Order (DCO) requirements such as the Code of Construction Practice (in Appendix 16.1 Code of Construction Practice).
- 1.1.2 No residual significant effects have been identified assuming the AMS and other good practice measures.
- 1.1.3 Table 1.1 outlines potential impacts resulting in a significance of effect of moderate or above, i.e. a significant effect in Environmental Impact Assessment (EIA) terms, prior to good practice measures during construction. Table 1.2 outlines potential impacts resulting in a minor or negligible significance of effect, i.e. not a significant effect in EIA terms, prior to good practice measures during construction. Table 1.3 outlines heritage assets upon which no impact is predicted during construction.
- 1.1.4 No physical impacts on historic buildings are predicted unless otherwise stated.

Table 1.1 Heritage Assets with Potential Impacts Resulting in Significant Effects Prior to Good Practice Measures During Construction

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
83	Remnants Of A Medieval Or Later Field System South Of Durley Street	Low	This heritage asset lies partially within the Order Limits at a point where the pipeline route runs adjacent to the existing pipeline. There is therefore a high potential for pre-existing impact to any archaeological remains which may be present. There is also the potential for partial damage or removal of Assets 1553 and 1554 which form	Permanent	Moderate	Moderate Adverse	Measures presented within the Archaeological Mitigation Strategy (AMS) would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			part of the setting of this heritage asset; however this is also likely to have a pre-existing impact from the existing pipeline route at this location. There is therefore the potential for some further partial damage or destruction to this heritage asset and its setting such that it would be clearly modified.						
92	Guidepost, Stephens Castle Down	Low	This guidepost is situated near to the edge of the Order Limits at an intersection that is within the area of a proposed Haul road. There is the potential for this heritage asset to be damaged or removed during construction of the project which could result in a change to most or all key archaeological materials, such that the resource is totally altered.	Permanent	Major	Moderate Adverse	Where there is known archaeology that is not being removed and recorded, appropriate protection measures would be implemented. This could include signage and fencing, and reduction or avoidance of topsoil stripping where practicable (G70).	No Change	Negligible
94	Stephen's Castle Down	Medium	This heritage asset is situated within the boundary of a construction compound and near to the drive/receiving pit for an auger bore trenchless crossing. While the geophysical survey data did not identify archaeological remains at the specific	Permanent	Major	Major Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			location of this HER record, this does not negate the possibility that these archaeological remains are present. Based on available information pertaining to the water level for this location, the water table is not expected to be intercepted during auger boring at a depth of 6.0mbgl and thus dewatering is not likely to occur at this location. However, there is the potential for complete or partial removal of archaeological remains associated with this heritage asset indicating a change to most or all key archaeological materials, such that the resource is totally altered.						
308	WWII Aircraft Crash Site, Near Westbrook Grange	Low	The exact location and potential for in situ remains of the crash are unclear; particularly considering that the Order Limits at this location are parallel to the existing pipeline indicating a high potential for pre-existing impact if these archaeological remains had been present. However, the location provided by the HER	Permanent	Major	Moderate Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			is within 100m of the Order Limits and the potential for a physical impact on these remains cannot therefore be ruled out. If remains are encountered, these would be automatically be designated as a Protected Place under the Protection of Military Remains Act 1986, and a licence would be required from the Secretary of State before any further disturbance of the remains could be undertaken. If remains associated with the plane are encountered and removed under licence during construction, the would have the potential for a change to most or all key archaeological materials, such that the resource is totally altered.						
648	Pyestock/Basingstoke Canal Boundary Marker	Low	This heritage asset is situated near to the edge of the Order Limits and within the vicinity of both a Construction Compound and a drive pit/receiving pit compound associated with the trenchless crossing of the Basingstoke Canal. There is the potential for damage or destruction of this boundary	Permanent	Major	Moderate Adverse	Where there is known archaeology that is not being removed and recorded, appropriate protection measures would be implemented. This could include signage and fencing, and reduction or avoidance of topsoil stripping	No Change	Negligible

			marker such that the resource is totally altered.				where practicable (G70).		
770	World War Two Aircraft Crash: Deepcut	Low	The exact location and potential for in situ remains of the crash are unclear. However, the location provided by the HER is within 50m of the Order Limits near to a Construction Logistics Hub and the potential for a physical impact on these remains cannot therefore be ruled out. If remains are encountered, these would be automatically be designated as a Protected Place under the Protection of Military Remains Act 1986, and a licence would be required from the Secretary of State before any further disturbance of the remains could be undertaken. If remains associated with the plane are encountered and removed under licence during construction, the would have the potential for a change to most or all key archaeological materials, such that the resource is totally altered.	Permanent	Major	Moderate Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
826	World War Two Aircraft	Low	The exact location and potential for in situ remains of	Permanent	Major	Moderate Adverse	Measures presented within the AMS would	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
	Crash: Chobham		<p>the crash are unclear; particularly considering that the Order Limits at this location are, in part, parallel to the existing pipeline and within a developed area indicating a high potential for pre-existing impact if these archaeological remains had been present. However, the location provided by the HER is within 100m of the Order Limits and the potential for a physical impact on these remains cannot therefore be ruled out. If remains are encountered, these would be automatically be designated as a Protected Place under the Protection of Military Remains Act 1986, and a licence would be required from the Secretary of State before any further disturbance of the remains could be undertaken. If remains associated with the plane are encountered and removed under licence during construction, the would have the potential for a change to most or all key archaeological materials, such that the resource is totally altered.</p>				<p>be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).</p>		

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
828	Steep Acre Farm	Medium	If archaeological remains are present, there is the potential for them to extend to within the Order Limits; however, at this locations, the route is adjacent to the existing pipeline suggesting a high potential for pre-existing impact. The main potential impact on this heritage asset would be in relation to the drive pit/receiving pit and compound for the HDD or auger bored trenchless crossing and the potential for dewatering. If archaeological remains are present, there is the potential for a change to key archaeological materials such that the heritage asset is clearly modified.	Permanent	Moderate	Moderate Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67). Temporary sheet piling or similar for control of groundwater would be put in place at the following trenchless crossings: TC 014, TC 015, TC 020, TC 023, TC 031, TC 032, TC 036, TC 037, TC 040 and TC 042, unless a detailed assessment is undertaken which demonstrates that no building or infrastructure is at risk of differential settlement (W13).	Negligible	Negligible
829	Steep Acre Farm	Medium	There is the potential for construction to be visible and/or audible from this location. In particular, this heritage asset is situated within close proximity to a drive pit/receiving compound for a trenchless crossing. There is the potential for	Permanent	Moderate	Moderate Adverse	The REAC also includes measures for noise, access to sites, reduced working width in sensitive areas, the reinstatement of vegetation, and control of ground water levels. These measures will	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			dewatering at this location which, as a worst case scenario, could permanently impact the foundations of this historic building. There is the potential for alteration to the setting of this heritage asset through the removal of vegetation during construction. Overall there is the potential for a permanent impact on the fabric of the building and noticeable change to the setting of this heritage asset.				serve to reduce impacts to Historic Buildings, Archaeological Remains, and Historic Landscapes. Temporary sheet piling or similar for control of groundwater would be put in place at the following trenchless crossings: TC 014, TC 015, TC 020, TC 023, TC 031, TC 032, TC 036, TC 037, TC 040 and TC 042, unless a detailed assessment is undertaken which demonstrates that no building or infrastructure is at risk of differential settlement (W13).		
957	Enclosure And Ring Ditch Cropmarks, Chertsey	Medium	Although the full extent of this heritage asset is unclear, there is a high potential for associated archaeological remains to extend to within the Order Limits. There is therefore the potential for partial damage or destruction of archaeological remains such that the heritage asset would be clearly modified. The value of this heritage	Permanent	Moderate	Moderate Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage asset.						
1029	Sub-Rectangular Enclosure Or Drainage Ditch Cropmarks, Chertsey	Medium	The full extent of this heritage asset is unclear, but the proximity of the heritage asset location to the Order Limits suggests that this linear feature type would likely extend to within the Order Limits. There is also the potential for this heritage asset to extend to within the drive pit/receiving pit of a HDD trenchless crossing. There is therefore the potential for damage or destruction to archaeological remains during construction which would result in changed to many key archaeological materials such that the resource would be clearly modified.	Permanent	Moderate	Moderate Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Minor Adverse
1049	Sub-Circular Enclosure And Ring Ditch Cropmarks, Chertsey	Medium	The full extent of this heritage asset is unclear, but the proximity of the heritage asset location to the Order Limits suggests that this linear feature type would	Permanent	Moderate	Moderate Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological	Negligible	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			likely extend to within the Order Limits. There is also the potential for this heritage asset to extend to within the drive pit/receiving pit of a HDD trenchless crossing. There is therefore the potential for damage or destruction to archaeological remains during construction which would result in changed to many key archaeological materials such that the resource would be clearly modified.				remains that may be found (G67).		
1343	Farnborough Hill, Hampshire County Council	Medium	The Order Limits roughly follow the boundary of the Farnborough Hill School, with the addition of a temporary construction compound in a field in the north of this heritage asset and a drive pit/receiving compound to the southwest of this heritage asset for an auger bored trenchless crossing. There is the potential for construction to be visible and/or audible from this location, though REAC commitments would reduce the level of this impact. The setting of this building also includes historic landscape elements within the grounds of this heritage	Permanent	Moderate	Moderate Adverse	The REAC also includes measures for noise, access to sites, reduced working width in sensitive areas, the reinstatement of vegetation, and control of ground water levels. These measures will serve to reduce impacts to Historic Buildings, Archaeological Remains, and Historic Landscapes.	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			asset, removal of these has the potential for a permanent adverse effect on the setting; however, the Order Limit has been designed to avoid the majority of the trees on the grounds and their roots, including a reduced working width within this area. Overall, there is a potential for changes to the setting of this historic building, such that it is noticeably changed.						
1344	Farnborough Hill, Rushmoor Borough Council	Medium	The Order Limits roughly follow the boundary of the Farnborough Hill School, with the addition of a temporary construction compound in a field in the north of this heritage asset and a drive pit/receiving compound to the southwest of this heritage asset for an auger bored trenchless crossing. Construction of the project will therefore be fully visible and audible within this Conservation Area. There is therefore a short term impact on the setting of this heritage asset from construction to be visible and/or audible from this location such that the setting of the heritage asset is significantly modified. This	Permanent	Moderate	Moderate Adverse	The REAC also includes measures for noise, access to sites, reduced working width in sensitive areas, the reinstatement of vegetation, and control of ground water levels. These measures will serve to reduce impacts to Historic Buildings, Archaeological Remains, and Historic Landscapes.	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			<p>Conservation Area includes historic landscape elements within the grounds of this heritage asset, removal of these has the potential for a permanent adverse effect on this heritage asset; however, the Order Limit has been designed to avoid the majority of the trees on the grounds, and the removal of vegetation will be limited and primarily restricted to the area of the existing pipeline. This heritage asset was visited during the Jacobs Heritage Walkover Survey (September 2018) and it was noted that the impact of the existing pipeline, which cuts through the grounds rather than following the boundary edge (which is the proposed pipeline route), is negligible. Overall, there is a potential for changes to the setting of the Conservation Area, such that it is significantly modified.</p>						
1502	Linear And Ring Ditch Cropmarks, Laleham	Medium	<p>The full extent of this heritage asset is unclear but may represent a complex cropmark site which may be situated along a Roman road. There is the potential</p>	Permanent	Moderate	Moderate Adverse	<p>Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological</p>	Negligible	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			for pre-existing impact on this site in relation to the area's designation as an Authorised Landfill Site; however this potential has not been clarified and it must be assumed that archaeological remains may exist in situ unless prior damage or destruction can be more clearly shown. There is therefore the potential for changes to many key archaeological materials, such that the resource would be clearly modified.				remains that may be found (G67).		
1580	NMP Field System 6	Medium	This is an extensive field system of which many features lie partially within the Order Limits. These heritage assets have the potential to be partially damaged or destroyed, there is a change to many of the archaeological materials such that the resource and the interrelationship between these features would be clearly modified.	Permanent	Moderate	Moderate Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Minor Adverse
1592	NMP Field System 10	Medium	This heritage asset is an extensive field system which lies partially within the Order Limits. Although the pipeline route at this location is near	Permanent	Moderate	Moderate Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant	Negligible	Minor Adverse

Negligible	Negligible
HLT98	Chobham Common	Medium	Chobham Common is an important area of ancient heathland and all vegetation within its grounds would comprise components which contribute to the historic landscape character. The existing pipeline route which extends across the common runs below a footpath, however, if the project extends beyond the footpath there is the potential for partial damage or destruction	Permanent	Moderate	Moderate Adverse	The REAC also includes measures for noise, access to sites, reduced working width in sensitive areas, the reinstatement of vegetation, and control of ground water levels. These measures will serve to reduce impacts to Historic Buildings, Archaeological	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			<p>to historic landscape elements, namely the heathland vegetation. There are also two construction compounds within the common which also have the potential for physical damage or destruction of historic landscape elements. There is also approximately 775m of the route which is crossed by three sections of horizontal directional drilled trenchless crossing which will reduce the impact overall. It is recognised that heathland management involves the removal and regeneration of vegetation, and therefore the removal of portions of heathland vegetation are not inherently significant to the overall maintenance of this HLT. There is also the potential for noise and visual impact in what is normally a tranquil environment (Jacobs Heritage Walkover Survey, September 2018) and, as the works will likely restrict the common usage of the area, changes to use or access. Overall, there is the potential for moderate changes to the</p>				<p>Remains, and Historic Landscapes. Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).</p>

			historic landscape character of this HLT.						

Table 1.2 Heritage Assets with Potential Impacts Resulting in No Significant Effects Prior to Good Practice Measures During Construction

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
12	Uplands Farm: Farm Building 30 Yds North West Of Farmhouse	Medium	There is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a slight change to the setting of this historic building such that it is hardly affected.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
17	Hollow Way	Low	It is likely that this heritage asset has been partially destroyed by the existing pipeline, however there is the potential for this heritage asset to extend further into the current Order Limits. There is the potential for partial removal of archaeological remains resulting in a change to key archaeological materials,	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			such that the resource is slightly altered.						
36	Post Medieval Quarries Or Extractive Pits, South Of Hill Farm, Durley	Negligible	This heritage asset is crossed by an HDD trenchless crossing. The HDD technique will minimise the potential impact on this heritage asset; however there is the potential for damage and partial removal of this heritage asset where the pipe is inserted. There is also the potential for damage through compression and/or partial removal of this heritage asset where it underlies the drive pit/receiving compound.	Permanent	Major	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
38	Hill Farm	Low	Although the heritage asset is largely shielded from the Order Limits by vegetation and neighbouring properties, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting and there is therefore the potential for a slight change to the setting of this historic buildings that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
50	Medieval Farmstead, Possible Mill, Maddoxford Farm	Medium	The exact nature and extent of this heritage asset is unclear and known only from documentary sources. The location of the potential mill will not be physically impacted during construction; however the land associated with this farmstead is likely to be crossed by the project. If in situ archaeological remains are present, there is the potential for damage or removal of archaeological remains such that the archaeological remains would be slightly altered. Our understanding of their significance would be primarily derived from their physical remains rather than their setting.	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
53	Granary 5M South Of Netherhill House	Medium	There is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
54	Netherhill House	Medium	There is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
55	Findens Farm, Kytes Lane	Low	Although the heritage asset is partially shielded from the Order Limits by vegetation and neighbouring properties, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting and there is therefore the potential for a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
57	Brown Heath, Gregory Lane	Low	Construction will be visible and audible from this location as this historic buildings is situated approximately 50m east of a Construction Compound. There is the	Short Term	Moderate	Minor Adverse	None Proposed	Moderater	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			potential for a change to the setting of this historic building such that it is significantly modified; however, this will not affect the value of this heritage asset.						
64	Durley Manor Farm	Medium	This heritage asset has above ground remains which are within an area of vegetation and which are visually shielded from the project. There is the potential for a very limited level of construction to be visible and/or audible from this location during construction resulting in very minor changes to the setting of this heritage asset.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
66	The Manor Cottage, the Drove, Manor Road	Low	Although the heritage asset is partially shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting and there is therefore the potential for a slight change to the setting of this historic buildings that hardly affects it.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
67	Curvilinear Enclosure East Of Manor Farm Cottages, Durley	Medium	No physical impact on this heritage asset is predicted. There is also the potential for the archaeological remains of Asset 83, which form the setting of this heritage asset, to be partially removed; however, due to likely pre-existing impact from the existing pipeline, the route is not expected to remove a high percentage of Asset 83 and this impact would not affect our understanding of these heritage assets. There is therefore the potential for change to archaeological materials such that the heritage asset is slightly altered and a very minor change to the setting of this heritage asset.	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
68	Wintershill Farm	Low	Although the heritage asset is partially shielded from the Order Limits by vegetation, it is likely that construction of the project would be visible and/or audible from this heritage asset. A temporary construction compound is proposed to be installed in a field southeast of this heritage asset, however it will not increase traffic on the road which runs through this	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			heritage asset. Overall there is the potential for a noticeable change to the setting of this historic building.						
70	Toll House On A333	Low	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a slight change to the setting of this historic building that hardly affects it.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
72	Cross Lane Cottage	Medium	Although the heritage asset is partially shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
89	Prehistoric And Roman	Medium	No physical impact on this heritage asset is predicted.	Permanent	Minor	Minor Adverse	Measures presented within the AMS would	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
	Enclosures, Field Systems And Trackways North East Of Betty Mundy's Cottage, Exton		There is the potential for the archaeological remains of Asset 1592, which are within the setting of this heritage asset, to be partially removed; however, the route is not expected to remove a high percentage of Asset 1592 and the potential for this impact to affect our understanding of these heritage assets is therefore low. Regardless, there is the potential for a slight change to the setting of this heritage asset.				be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).		
91	Former Quarry North Of Netherhill Farm, Durley	Negligible	There is the potential for partial removal of this heritage asset indicating a change to many key archaeological materials, such that the resource would be clearly modified.	Permanent	Moderate	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
103	Enclosure, Field West Of Lower Preshaw Farm	Medium	No physical impact on this heritage asset is predicted. There is the potential for an impact to the setting of this heritage asset through partial damage or removal of the surrounding field system (Asset 1136); however, the route is not expected to remove a high percentage of	Permanent	Negligible	Negligible	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			Asset 1136 and the potential for this impact to affect our understanding of these heritage assets is therefore low. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage asset.						
104	Timber-Framed Barn At Lower Preshaw Farm	Medium	The Order Limits include the use of Lower Preshaw Lane as an access route which runs through Lower Preshaw Farm and between Asset 104 and Assets 105 and 109 which are an associated old farmhouse, granary and barn. There is likely to be an increase in construction traffic along this route. The Order Limits for the pipeline route are partially shielded from this heritage asset by vegetation and the neighbouring properties; however it is possible that construction would be visible and/or audible from this location. Overall, there is a potential impact on the setting of this heritage asset	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			such that it is noticeably changed.						
105	Old Farmhouse	Medium	The Order Limits include the use of Lower Preshaw Lane as an access route which runs through Lower Preshaw Farm and between Asset 104 and Assets 105 and 109 which are an associated old farmhouse, granary and barn. There is likely to be an increase in construction traffic along this route. The Order Limits for the pipeline route are partially shielded from this heritage asset by vegetation and the neighbouring properties; however it is possible that construction would be visible and/or audible from this location. There is the potential for removal of vegetation that falls within the setting of this heritage asset; however, this is along the line of the existing pipeline and vegetation removal would be minimal. Overall, there is a potential impact on the setting of this heritage asset such that it is noticeably changed.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
109	Granary 5M North Of Old Farmhouse	Medium	The Order Limits include the use of Lower Preshaw Lane as an access route which runs through Lower Preshaw Farm and between Asset 104 and Assets 105 and 109 which are an associated old farmhouse, granary and barn. There is likely to be an increase in construction traffic along this route. The Order Limits for the pipeline route are partially shielded from this heritage asset by vegetation and the neighbouring properties; however it is possible that construction would be visible and/or audible from this location. There is the potential for removal of vegetation that falls within the setting of this heritage asset; however, this is along the line of the existing pipeline and vegetation removal would be minimal. Overall, there is a potential impact on the setting of this heritage asset such that it is noticeably changed.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
112	Enclosure, north Of	Medium	No physical impact on this heritage asset is predicted. There is the potential for the archaeological remains of	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
	Crookhorn Copse		Asset 1592, which are within the setting of this heritage asset, to be partially removed; however, the route is not expected to remove a high percentage of Asset 1592 and the potential for this impact to affect our understanding of these heritage assets is therefore low. Regardless, there is the potential for a slight change to the setting of this heritage asset.				record any significant archaeological remains that may be found (G67).		
116	Lomer Farmhouse	Medium	Construction will be visible and audible from this location; however this is unlikely to be significantly above that which is experienced within the current agricultural setting. There is the potential for a noticeable change to the setting of this historic building.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
119	Enclosure, Field West Of Rooksgrove Farm	Medium	The NMP data suggests that a very small portion of the archaeological remains associated with this heritage asset would fall within the Order Limits. They are also likely to have been previously impacted by the existing pipeline near to this location	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			and may not remain in situ. If archaeological remains associated with this heritage asset still exist in situ, the potential damage or partial destruction of this heritage asset during construction could therefore result in a change to key archaeological materials, such that the heritage asset would be slightly altered.						
120	Prehistoric Features, Watching Brief At Woodstock Green	Negligible	This feature has been partially removed and no further physical impacts to any potentially remaining archaeological remains are predicted. There is the potential for a very minor change to the setting of this heritage asset through partial damage or removal of archaeological remains of Asset 119; however any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage asset.	Permanent	Negligible	Negligible	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
121	Barrow, Field West Of Rooksgrove Farm	Medium	No physical impact on this heritage asset is predicted. There is the potential for a very minor change to the setting of this heritage asset	Permanent	Negligible	Negligible	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			through partial damage or removal of archaeological remains of Asset 119; however any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage asset.				archaeological remains that may be found (G67).		
126	Black House Farmhouse	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
127	Joan's Acre	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and the neighbouring property, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			above that which may be experienced within the current agricultural setting; however, there is the potential for a noticeable change to the setting of this historic building.						
139	Barrow South Of Joan's Acre Road	Medium	No physical impact on this heritage asset is predicted. There is the potential for a temporary impact on the setting of this heritage asset through disruption of the intervisibility between nearby barrows and due to potential partial damage or removal of one of the barrows within this area (Asset 1639); but this would be a very minor change to the setting and would not effect its value.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
141	Garden Wall And Gazebo Immediately West South West Of Woodcote Manor	Medium	Although the heritage asset is very well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a slight change	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			to the setting of this historic building that hardly affects it.						
142	The Gardeners Cottage	Medium	Although the heritage asset is very well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
143	Woodcote Manor	High	Although the heritage asset is very well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
144	Coach House At Woodcote Manor	Medium	Although the heritage asset is very well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
145	Barn At Woodcote Manor 20M East Of Coach House	Medium	Although the heritage asset is very well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a slight change to the setting of this historic building that hardly affects it. 162	Trackway 1	Low	There is the potential for partial removal of this heritage asset indicating a change to key archaeological	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			materials, such that the resource would be slightly altered.				record any significant archaeological remains that may be found (G67).		
166	Field System 3	Low	The full extent of this feature is not clear; however, the pipeline route at this point runs adjacent to the existing pipeline indicating that there is likely to be a high level of pre-existing damage to and potential archaeological remains associated with this heritage asset within the Order Limits. If any archaeological remains associated with this heritage asset remain in situ, there is the potential to damage or destroy a small area of these heritage assets indicating that there would be changes to the key archaeological materials such that the heritage asset would be slightly altered.	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
205	Jayswood Cottage	Medium	Although the heritage asset is partially shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			which may be experienced within the current agricultural setting and there is therefore the potential for a slight change to the setting of this historic buildings that hardly affects it.						
211	Headmore Farmhouse	Medium	Although the heritage asset is partially shielded from the Order Limits by vegetation and neighbouring buildings, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a slight change to the setting of this historic buildings such that it is noticeably changed.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
238	Farringdon Cottage	Medium	There are no impact pathways for effects on setting due to the inherent shielding between the Order Limits for the pipeline route and the heritage asset. The closest section of the Order Limits to this heritage asset is an offsite access road with the main pipeline construction occurring c. 350m away. There is potential for construction of the project to increase traffic on the A32 adjacent to the	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			heritage asset however, due to the vegetation shielding the historic building from the road, this is unlikely to result in more than a slight change to the setting of the heritage asset such that hardly affects it.						
239	Farringdon Hurst	Medium	There are no impact pathways for effects on setting due to the inherent shielding between the Order Limits for the pipeline route and the heritage asset. The closest section of the Order Limits to this heritage asset is an offsite access road with the main pipeline construction occurring c. 350m away. There is potential for construction of the project to increase traffic on the A32 adjacent to the heritage asset however, due to the vegetation shielding the historic building from the road, this is unlikely to result in more than a slight change to the setting of the heritage asset such that hardly affects it.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
245	Trackway 3	Low	The extent of this trackway is not fully known, but it appears to extend from	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			Berryhill Plantation to Jubilee Clump and therefore to within the Order Limits. This is in an area defined for use as an off site access road and not the pipeline route. This has the potential for partial damage or destruction such that the heritage asset would be slightly altered.				preserve in situ or by record any significant archaeological remains that may be found (G67).		
313	Truncheaunts	Medium	Although the heritage asset is very well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
314	Dovecote 5M East Of Truncheaunts	Medium	Although the heritage asset is very well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			experienced within the current agricultural setting; however, there is the potential for a noticeable change to the setting of this historic building.						
366	Stable And Kitchen Garden Wall 30M North West Of The Manor House	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a slight change to the setting of this historic building that hardly affects it.	Short term	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse
369	Manor House	High	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a slight change to the setting of this historic building that hardly affects it.	Short term	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse
378	Stable And Malthouses, 10M East Of	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties,	Short term	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
	The Manor House		there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a slight change to the setting of this historic building that hardly affects it.						
390	Turnpike Cottages	Medium	This heritage asset is situated within close proximity to a proposed construction compound. The heritage asset is at least partially shielded by vegetation and neighbouring properties, however there is the potential for an increase in construction to be visible and/or audible from this location, primarily in relation to increased construction traffic. The setting of this heritage asset is already impacted by current visual and noise intrusion from the A31 which is directly adjacent to the heritage asset. There is therefore the potential for a noticeable change to the setting of this heritage assets which would not impact upon its character or value.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
391	Froyle Place (Known As Gasston House)	High	There is the potential for construction to be visible and/or audible from this location. The route extends approximately 250m to the south of Asset 391 through the grounds of Treloars College (HLT32) which once comprised Froyle Park and which forms the setting of this historic building; there is the potential for minimal removal of vegetation which will not affect the value of this heritage asset. Overall there is the potential for change to the setting of this historic buildings such that it is noticeably changed.	Short term	Moderate	Minor Adverse	The REAC also includes measures for noise, access to sites, reduced working width in sensitive areas, the reinstatement of vegetation, and control of ground water levels. These measures will serve to reduce impacts to Historic Buildings, Archaeological Remains, and Historic Landscapes.	Minor	Minor Adverse
398	Church Of St Mary Of The Assumption	High	This heritage asset is well shielded by vegetation, but there is still the potential for construction to be visible and/or audible from this location. The route is situated over 275m to the south of heritage asset 398 through the grounds of Treloars College (HLT32) which once comprised Froyle Park and which forms the broader setting of this historic building; there is the potential for minimal removal of vegetation which will not	Short term	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			affect the value of this heritage asset. Overall there is the potential for a slight change to the setting of this historic building that hardly affects it.						
400	Turnpike Cottages 2	Medium	This heritage asset is situated within close proximity to a proposed construction compound. The heritage asset is at least partially shielded by vegetation and neighbouring properties, however there is the potential for an increase in construction to be visible and/or audible from this location, primarily in relation to increased construction traffic. The setting of this heritage asset is already impacted by current visual and noise intrusion from the A31 which is directly adjacent to the heritage asset. There is therefore the potential for a noticeable change to the setting of this heritage assets which would not impact upon its character or value. 644	Underpass At Tweseldown Racecourse	Medium	There is the potential for construction to be visible and/or audible from this location. There is also the potential for an increase in	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			construction traffic along this road associated with a Construction Compound to the west. Overall there is the potential for a noticeable change to the setting of this heritage asset.						
646	Basingstoke Canal	Medium	The Basingstoke Canal will not be physically affected during construction and will be crossed by a HDD trenchless crossing. This area of the Basingstoke Canal is located within the immediate vicinity of a major roundabout junction and any potential noise or visual intrusion is unlikely to be a significant change the current setting.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
647	Site Of C19 Bridge At Norris Bridge	Low	No physical impact on this heritage asset is predicted. There is the potential for construction to be visible and/or audible from this location on the setting of this heritage asset from the drive pit/receiving compound for the trenchless crossing of the Basingstoke Canal; however, as it is situated within the Norris Bridge roundabout junction, the potential change	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			to the setting of this heritage asset would be very minor.						
656	Belmore Farm, Cove	Low	This heritage asset is well shielded by vegetation associated with the golf course. However, due to its proximity to the project, if any remains do exist then there is the potential for some very minor changes to their setting from construction to be visible and/or audible from this location.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
673	North Lodge, Including Attached Wall, Farnborough Hill School	Medium	There is the potential for construction to be visible and/or audible from this location. This heritage asset is immediately adjacent to an access route associated with a Construction Compound situated to the east of Asset 673. Overall there is the potential for a noticeable change to the setting of this heritage asset; however its value will not be affected.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
674	South Lodge	Medium	The Order Limits of the project are separated from this historic building by the A325; however, there is the potential for construction to be visible and/or audible from this location. This is unlikely to significantly increase the	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			noise and visual intrusion caused by the current urban environment. There is the potential for a slight change to the setting of this historic building that hardly affects it.						
676	Main Building To Farnborough Hill Convent	High	This heritage asset is situated on high ground with a distinct slope down to the school grounds where the Order Limits are located. There is also a temporary construction compound in a field to the north of this heritage asset and a drive pit/receiving compound to the southwest of this heritage asset for an auger bored trenchless crossing. There is the potential for construction to be visible and/or audible from this location, though REAC commitments would reduce the level of this impact. The setting of this building also includes historic landscape elements within the grounds of this heritage asset, removal of these has the potential for a permanent adverse effect on the setting; however, the Order Limit has been designed to avoid the majority of the trees on the grounds and their roots,	Short term	Moderate	Minor Adverse	The REAC also includes measures for noise, access to sites, reduced working width in sensitive areas, the reinstatement of vegetation, and control of ground water levels. These measures will serve to reduce impacts to Historic Buildings, Archaeological Remains, and Historic Landscapes.	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			including a reduced working width within this area. Overall, there is a potential for changes to the setting of this historic building, such that it is noticeably changed.						
699	Oriel Cottage	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties as well as a high fence, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
705	Rose Cottage	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties as well as a high fence, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
712	Empress Cottages	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			as well as a high fence, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a slight change to the setting of this historic building that hardly affects it.						
715	Emperor House, Empress Cottage, Eugenee Cottage, Ye Olde Farm	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties as well as a high fence, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
720	Yew Tree Cottage	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties as well as a high fence, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a slight change to the setting of this	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			historic building that hardly affects it.						
772	Heatherside House Gardens	Low	The extent of this parkland, which is no longer extant, is unclear. There is the potential for prior impact in this area through gravel extraction marked on the Ordnance Survey mapping from 1937 and from the installation of the existing pipeline. If archaeological remains are present, there is the potential for them to extend to within the Order Limits and they may be partially damaged or removed. This heritage asset is no longer physically associated with Heatherside House (Asset 1930) due to the increasing urbanisation of the area and the development which has occurred and no impacts to the setting of this heritage asset is predicted. Overall, if archaeological remains are present, there is the potential for changes to archaeological materials such that the heritage asset is slightly altered.	Permanent	Minor	Negligible	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
785	Lightwater Manor Gardens	Low	There is the potential for construction of the project to damage or destroy archaeological remains associated with this heritage asset - in particular the surrounding boundary bank - such that it would be clearly modified. The modern, developed setting indicates that the value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage asset.	Permanent	Moderate	Minor Adverse	None Proposed	Moderate	Minor Adverse
786	Military Earthworks Turf Hill	Low	The full extent of the military earthworks on Turf Hill is not clear and although most appear on satellite imagery to be south of the Order Limits, the potential for these heritage assets to extend to within them cannot be ruled out. There is therefore the potential for partial damage or destruction of archaeological remains associated with this heritage asset such that the resource is slightly altered. There is also the potential for construction to be visible	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			and/or audible from this location on the setting of this heritage asset and for the removal of trees????						
794	The Kiln Field (Blackstrood)	Low	This heritage asset is evidenced by place name only and has been landscaped as part of a golf course. The route at this location is primarily situated adjacent to the existing pipeline suggesting a likely pre-existing impact on any archaeological remains if present. If archaeological remains were to remain in situ, there is the potential for partial damage or removal of archaeological remains, primarily within in the area of the drive pit/receiving compound of an auger bored trenchless crossing. There is also the potential for dewatering within an approximately 10m radius of the drive pit/receiving pit which may damage any currently waterlogged archaeological remains. This could result in changes to key archaeological materials such that the heritage asset is slightly altered.	Permanent	Minor	Negligible	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
796	Brooklands Farm House	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a noticeable change to the setting of this historic building.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
798	Barn 30 Yards To South Of Brooklands Farm House	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a noticeable change to the setting of this historic building.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
807	Cultivation Marks, Hokemedede	Negligible	Although the full extent of this heritage asset is unclear, there is a potential for archaeological remains to extend to within the Order Limits. There is also the potential that this heritage asset could extend to the drive pit/receiving compound for the nearby HDD trenchless crossing. There is therefore the potential for partial damage or destruction of archaeological remains	Permanent	Moderate	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			such that the heritage asset would be clearly modified. There is the potential for noise and visual intrusion; however, this would have no impact on our understanding and appreciation of this heritage asset.						
809	Barn 20 Yards Hookstone Farm House	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting. There is the potential for a slight change to the setting of this historic building that hardly affects it.	Short term	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse
811	Hookstone Farm House	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. 	Biddles Farm House		Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting and there is therefore the potential for a slight change to the setting of this historic buildings that hardly affects it.						
836	Biddles Farm House	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting and there is therefore the potential for a slight change to the setting of this historic buildings that hardly affects it.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
843	Home Farm	Medium	Although this heritage asset is partially shielded from the Order Limits by the neighbouring building, there is the potential for construction to be visible	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			and/or audible from this location. This is unlikely to be above that which may be experienced within the current agricultural setting. There is the potential for alteration to the setting of this heritage asset through the removal of vegetation during construction. Overall there is the potential for a noticeable change to the setting of this historic building.						
858	Bee Garden' Earthwork On Albury Bottom	High	No physical impacts on this heritage asset, or on the archaeological remains of Asset 867 which form the setting of this heritage asset, are predicted. The interrelationship between Asset 867 and Asset 858 will not be affected. This heritage asset is situated on high ground over 250m to the north of the project. Jacobs Cultural Heritage Walkover Survey (03/09/2018) confirmed that, despite the distance and the scattered shielding provided by the vegetation overall, its location on higher ground and within an otherwise tranquil location indicates the potential for some	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			construction to be visible and/or audible from this location, resulting in the potential for a slight change to the setting of this heritage asset.						
866	Possible Holloways: Jubilee Clump	Low	The full extent of this heritage asset is unclear, however due to the proximity of the HER grid reference to the Order Limits it is likely that some of these trackways or hollow ways extend to within the pipeline route. There is therefore the potential for partial damage or destruction of this heritage asset such that the resource is clearly modified. There is also the potential for impacts to the setting of this heritage asset through the partial removal of associated trackways or holloways which may impact our understanding of this heritage asset and construction to be visible and/or audible from this location during construction, such that there may be considerable changes to the setting that could affect the character of the heritage asset.	Permanent	Moderate	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
867	Earthworks: Albury Bottom	Medium	No physical impacts on this heritage asset, or on the archaeological remains of Asset 858 which form the setting of this heritage asset, are predicted. The interrelationship between Asset 867 and Asset 858 will not be affected. This heritage asset is situated on high ground over 250m to the north of the project. Jacobs Cultural Heritage Walkover Survey (03/09/2018) confirmed that, despite the distance and the scattered shielding provided by the vegetation overall, its location on higher ground and within an otherwise tranquil location indicates the potential for some construction to be visible and/or audible from this location, resulting in the potential for a slight change to the setting of this heritage asset.	Short term	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
885	Bowl Barrow 150M North- West Of Pipers Green Stud	High	Although this heritage asset is situated only c.20m from the Order Limits, no physical impact on this heritage asset is predicted. No physical impact to other bowl barrows within the vicinity are	Short term	Minor	Minor Adverse	Where there is known archaeology that is not being removed and recorded, appropriate protection measures would be implemented. This	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			<p>predicted and there is currently no intervisibility between these heritage assets. There is the potential for construction to be visible and/or audible from this location on this otherwise tranquil setting, resulting in a change to the setting of this heritage asset, but the character and value of this heritage asset will not be affected. There is also the potential for the removal of vegetation within the heritage asset's immediate environment, however the current treed environment is unrelated to the original setting of this Prehistoric feature and has no bearing on our understanding of the archaeological remains. Tree removal has the potential to slightly increase intervisibility between this round barrow and others situated nearby thereby enhancing the setting of this heritage asset. Overall there is the potential for a slight change to the setting of this heritage asset.</p>				could include signage and fencing, and reduction or avoidance of topsoil stripping where practicable (G70).		
886	Bowl Barrow 2	Medium	No physical impacts on this heritage asset, or on other bowl barrows within the	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			vicinity which forms the broader setting of this heritage asset, are predicted. There is currently no intervisibility between these heritage assets. This heritage asset is well shielded by treed vegetation; however, there is the potential for construction to be visible/audible from this location resulting in a slight change to the setting of the heritage asset. It would not affect the way this heritage asset is understood or appreciated.						
891	Bowl Barrow 80M North-West Of Flutters Hill	High	No physical impacts on this heritage asset, or on other bowl barrows within the vicinity which forms the broader setting of this heritage asset, are predicted. There is currently no intervisibility between these heritage assets. This heritage asset is over 250m north of the Order Limits and most of the intervisibility is shielded by the surrounding vegetation; however, there is the potential for construction to be visible and/or audible from this location which is unlikely to result in more than	Short term	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			a very minor change to the setting of this heritage asset.						
893	Possible Bowl Barrow	Medium	No physical impacts on this heritage asset, or on other bowl barrows within the vicinity which forms the broader setting of this heritage asset, are predicted. There is currently no intervisibility between these heritage assets. This heritage asset is well shielded by the small copse of trees within which it is situated; however, there is the potential for construction to be visible/audible from this location resulting in a slight change to the setting of the heritage asset. It would not affect the way this heritage asset is understood or appreciated.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
916	Anchor House	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
917	Silverlands, Holloway Hill, Chertsey	Low	There has been substantial modifications to the original estate and it is unclear if archaeological remains associated with the original historic landscape remain. If present, there is the potential for damage or removal of archaeological remains; however, the Order Limits follow the existing pipeline route at this locations, indicating the potential for pre-existing impact. There is the potential for physical removal of historic landscape elements, mainly vegetation, which may have an impact on the setting of this heritage asset; however, satellite imagery indicates that the treed border is a late 20th century addition to the property and not a feature of the historic parkland. There is the potential for construction to be visible and/or audible from this location. Overall, there is the potential for changes to archaeological materials such that the heritage asset is slightly altered and slight changes to the setting of this heritage asset.	Long term	Minor	Negligible	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
918	Ivy Cottage	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties and is separated from the Order Limits by Stonehill Road, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a slight change to the setting of this historic buildings that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
919	Silverlands	Medium	Although the heritage asset is well shielded from the Order Limits by vegetation and neighbouring properties, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current setting as a commercial stone supplier and there is the potential for a slight change to the setting of this historic buildings that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
928	Barn Of Hardwick Court Farm To	Medium	There is the potential for construction to be visible and/or audible from this location. There is the	Short term	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
	The West Of The House		potential for alteration to the setting of this heritage asset through the removal of vegetation during construction. The setting of this heritage asset is already impacted by current visual and noise intrusion from the fringe-urban environment in which it is situated and its proximity to the M25. The construction of the project is unlikely to have a significantly larger impact on the setting than these modern developments.						
929	Hardwick Court Farmhouse	Medium	Although the heritage asset is partially shielded from the Order Limits by vegetation, there is the potential for construction to be visible and/or audible from this location, in particular in relation to a Site Compound and the drive pit/receiving compounds for a trenchless crossing. There is therefore the potential for a slight change to the setting of this historic buildings that hardly affects it.	Short term	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse
943	Pannells Farm	Low	There is the potential for noise and visual intrusion on the setting of this heritage	Short term	Moderate	Minor Adverse	None Proposed	Moderate	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			asset associated with a Site Compound situated just to the north of the farm and access routes situated through the farm itself. There is the potential for pipeline installation to be visible and/or audible from this location; though this is unlikely to be substantially different from that experienced within the current agricultural setting, particularly in consideration of the close proximity of the M25 motorway. There is the potential for removal of vegetation associated with this farm; though this will not affect the value of this heritage asset. Overall there is the potential for a change to the setting of this heritage asset such that it is significantly modified.						
958	Cropmarks/Soilmarks: Chertsey 2	Low	Although the full extent of this heritage asset is unclear, there is a high potential for associated archaeological remains to extend to within the Order Limits. There is therefore the potential for partial damage or destruction of archaeological remains such that the heritage asset	Permanent	Moderate	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			would be clearly modified. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage asset.						
1004	Three Horse Shoes Public House	Medium	Although well shielded by vegetation, there is potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly more than that experienced within the agricultural and industrial setting (the land crossed by the project at this location has been utilised for quarrying). There is the potential for increased construction to be visible and/or audible from this location along Shepperton Road due to construction related traffic. This has the potential for slight changes to the setting of this historic building that hardly affects it.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

			asset which still remain in situ, if any, resulting in changes to key archaeological materials such that the heritage asset would be slightly altered.						
1298	Crondall	Medium	No physical impact on this heritage asset is predicted. Although generally well shielded by vegetation, construction of the project will be visible and audible at the southern end of this heritage asset. A temporary construction compound is proposed to be installed in a field southeast from this heritage asset which may increase construction traffic through this Conservation Area. There is the potential for a noticeable change to the setting of this heritage asset.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
1325	Basingstoke Canal	Medium	The majority of this heritage asset is crossed by a HDD trenchless crossing, with the receiving compound situated just within the Conservation Area. There will be no physical impact to historic buildings within the Conservation Area. There is the potential for vegetation	Permanent	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			clearance to enable the trenchless crossing of the Basingstoke Canal; however the surrounding vegetation at this location is not considered to contribute highly to the value of this heritage asset. The setting of this heritage asset is already impacted by current visual and noise intrusion from Norris Hill Road, Fleet Road and Ively Road junction which runs adjacent to and over the heritage asset; the construction of the project is unlikely to significantly add to the visual and noise intrusion on the setting of the heritage asset.						
1329	Site Of Brickworks, S Of Eelmoor Farm	Low	If archaeological remains are present, there is the potential for them to extend to within the Order Limits and for a change to key archaeological materials such that the heritage asset is slightly altered. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and	Permanent	Minor	Negligible	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			appreciation of this heritage asset.						
1348	Former Officers' Mess, Princess Royal Barracks, Deepcut	Low	This heritage asset is situated approximately 200m southeast of a Construction Logistics Hub. This heritage asset is well shielded by vegetation and neighbouring properties. There may be some increased noise and visual intrusion from construction traffic; however, this is likely to be a change to the setting of this historic building that hardly affects it.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
1349	Alma House, Princess Royal Barracks, Deepcut	Low	This heritage asset is situated approximately 90m southeast of a Construction Logistics Hub. This heritage asset is well shielded by vegetation. There may be some increased noise and visual intrusion from construction traffic; however, this is likely to be a change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1411	Possible Linear Earthworks: Albury Bottom	Low	No physical impacts on this heritage asset, or on the archaeological remains of Asset 858 which form the setting of this heritage asset, are predicted. The interrelationship between	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			Asset 1411 and Asset 858 will not be affected. This heritage asset is situated on high ground over 250m to the north of the project. Jacobs Cultural Heritage Walkover Survey (03/09/2018) confirmed that, despite the distance and the scattered shielding provided by the vegetation overall, its location on higher ground and within an otherwise tranquil location indicates the potential for some construction to be visible and/or audible from this location, resulting in the potential for a slight change to the setting of this heritage asset.						
1501	Shepperton Gravel Pits, Shepperton	Negligible	There is the potential for damage or removal of archaeological remains which extend to within the Order Limits of the project. Furthermore a construction logistics hub and the drive pit/receiving pit and compound for a HDD trenchless crossing are within the boundaries of this heritage asset. The historic gravel pit has broadly been repurposed and any physical	Permanent	Minor	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			impact will not impact upon the historic nature or value of this heritage asset. There is the potential for changes to the archaeological materials such that the resource is slightly altered.						
1506	Laleham	Medium	No physical impact on this heritage asset is predicted. There is potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly more than that experienced within the agricultural and industrial setting (the land crossed by the project at this location has been utilised for quarrying), resulting in a slight change to the setting of this heritage asset that would hardly affect it.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
1533	Roman Road, Winchester To London	Low	This proposed route for the Roman road from Winchester to London is just south of another predicted route (Asset 1288) which was evidenced during excavations in Neatham and is therefore more likely to be accurate; however this location is currently developed and any	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			archaeological remains which may have been present are likely to have been subject to pre-existing impact. This predicted road crosses the Order Limits in an area of HDD trenchless crossing and extends across a construction compound. There is the potential for partial damage or removal of archaeological remains if present, however, the trenchless crossing technique minimises the potential for this impact. If archaeological remains related to this heritage asset are present, then there is the potential for damage or destruction of a small portion of this heritage asset overall, such that the heritage asset would be slightly altered.						
1534	Roman Road, Silchester To Chichester	Low	This proposed route for the Roman road from Silchester to Chichester crosses Order Limits at a point where it is situated adjacent to the existing pipeline, indicating a high potential for pre-existing impact on any archaeological remains which may have been located in this area. However, if the Roman road	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			were to follow the proposed route, there would be the potential for a small portion of the heritage asset to be damaged or destroyed during construction such that the heritage asset would be slightly altered.						
1535	Roman Road, Neatham To Alice Holt	Low	This proposed route for the Roman road from Neatham to Alice Holt crosses the Order Limits at a point where it is situated adjacent to the existing pipeline, indicating a high potential for pre-existing impact on any archaeological remains which may have been located in this area. However, if the Roman road were to follow the proposed route, there would be the potential for a small portion of the heritage asset to be damaged or destroyed during construction such that the heritage asset would be slightly altered.	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
1536	Roman Road, Farley Heath To Bagshot 2	Low	This proposed route for the Roman road from Farley Heath to Bagshot crosses the Order Limits twice, once at a point where it is situated adjacent to the existing pipeline and also where the	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			<p>pipeline route follows a modern road, both indicating a high potential for pre-existing impact on any archaeological remains which may have been located in this area. However, if the Roman road were to follow the proposed route, there would be the potential for a small portion of the heritage asset to be damaged or destroyed during construction such that the heritage asset would be slightly altered.</p>				remains that may be found (G67).		
1537	Roman Road, Farley Heath To Bagshot 1	Low	<p>This proposed route for the Roman road from Farley Heath to Bagshot crosses the Order Limits twice, once in the location of a Construction Logistics Hub separate from the pipeline route and also at a point where the pipeline route is situated adjacent to the existing pipeline, indicating a high potential for pre-existing impact on any archaeological remains which may have been located in this area. However, if the Roman road were to follow this proposed route, there would be the potential for a small portion</p>	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			of the heritage asset to be damaged through compression by the Logistics Hub structure or damaged or destroyed during construction such that the heritage asset would be slightly altered.						
1538	Roman Road, London To Winchester 1	Low	This proposed route for the Roman road from London to Winchester crosses the Order Limits twice, both in areas where the pipeline route is situated adjacent to the existing pipeline, indicating a high potential for pre-existing impact on any archaeological remains which may have been located in this area. However, if the Roman road were to follow this proposed route, there would be the potential for a small portion of the heritage asset to be damaged or destroyed during construction such that the heritage asset would be slightly altered.	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible
1539	Roman Road, London To Winchester 2	Low	This proposed route for the Roman road from London to Winchester crosses the Order Limits three times. The first crossing is near to	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			<p>Hardwick Lane where both the existing pipeline and the route of the road would have caused a pre-existing impact on the majority of any pre-existing archaeological remains, if any. However, due to the angle of this potential heritage asset, there is the possibility that some archaeological remains may still exist in situ should this be the correct location of the roadway; if archaeological remains associated with this heritage asset were to be present within this location a small section of this heritage asset overall may be damaged or destroyed. Just north of this, the projected line of this heritage asset crosses an area within the Order Limits which extends beyond the line of the pipeline route; if archaeological remains associated with this heritage asset were to be present within this location a small section of this heritage asset overall may be damaged. The third location is within the Brett Landscaping Ltd Authorised Landfill site south</p>				archaeological remains that may be found (G67).		

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			of Shepperton Road. There is a cropmark visible in aerial photographs which runs at this angle and therefore, if a) the landfill has not had a previous impact on this heritage asset, b) this cropmark were to correspond with a Roman road, and c) archaeological remains associated with this heritage asset were to be present within this location, then a small section of this heritage asset overall may be damaged or destroyed such that the heritage asset would be slightly altered.						
1540	Roman Road, Staines To Ewell	Low	This proposed route for the Roman road from Stained to Ewell intersects the Order Limits either along Woodthorpe Road, where there is likely to be a pre-existing impact from the road development on any archaeological remain that may have been present and therefore no impact from the project, or within Fordbridge Park in an area of works for a trenchless crossing. If archaeological remains associated with this proposed route were to be	Permanent	Moderate	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			present, there would be the potential for a moderate impact through partial damage or destruction of this heritage asset such that the heritage asset would be clearly modified						
1553	NMP Ditch	Low	This heritage asset lies partially within the Order Limits at a point where the pipeline route runs adjacent to the existing pipeline. There is therefore a high potential for pre-existing impact to any archaeological remains which may be present. There is also the potential for partial damage or removal of Asset 83 which form the broader setting of this heritage asset; however this is also likely to have a pre-existing impact from the existing pipeline route at this location. There is therefore the potential for some further partial damage or destruction to this heritage asset and its setting such that it would be slightly modified.	Permanent	Minor	Minor Adverse	Measures presented within the AMS would be taken to protect or preserve in situ or by record any significant archaeological remains that may be found (G67).	Negligible	Negligible

			and/or audible from this location such that the setting of this heritage asset is significantly modified.						
1769	Manor Farmhouse	Medium	This heritage asset is situated within 1km of a proposed Construction Logistics Hub and is well shielded from the project by vegetation and the current A31. Overall, there is the potential for a slight change to the setting of this heritage asset that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1790	Trap Shed At Lyeway Farm	Low	Although the heritage asset is largely shielded from the Order Limits by vegetation and topography, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting and there is therefore the potential for a slight change to the setting of this historic buildings that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Minor	Minor Adverse
1804	The Lawn	Medium	This heritage asset is situated within 1km of a proposed Construction Logistics Hub and is well	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			shielded from the project by neighbouring properties and vegetation. Although the majority of traffic is likely to be routed along the A31 and would not enter through the village, there is the potential for construction to be visible and/or audible from this location due to increased traffic through Bishop's Sutton along the B3047 Bishops Sutton Road such that the setting of this heritage asset may be noticeably changed.						
1828	Hop Shed At Bury Court Farm	Low	This historic building is shielded by neighbouring properties and vegetation; however there is potential for construction of the project to be visible and/or audible from this heritage asset. A temporary construction logistics hub is proposed to be installed in a field southwest and across the road from this heritage asset which may create more of a visual and noise intrusion on this heritage asset and its setting than the pipe installation. There may be greater heavy vehicle traffic movement in this area during	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			the period of construction. There is the potential for a slight change to the setting of this heritage asset that would hardly affect it.						
1842	Farm Buildings At Lyeway Farm	Low	Although the heritage asset is largely shielded from the Order Limits by vegetation and topography, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting and there is therefore the potential for a slight change to the setting of this historic buildings that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1844	Oasthouses At Glade Farm	Low	Although the heritage asset is largely shielded from the Order Limits by the neighbouring buildings and topography, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting and there is therefore	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			the potential for a slight change to the setting of this historic buildings that hardly affects it.						
1857	Old Carpenters, Dares Lane, Ewshot, Farnham, Surrey, GU10 5BS,	Low	Although the heritage asset is partially shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly above that which may be experienced within the current agricultural setting; however, there is the potential for a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1860	Ewshot Village Hall, Tadpole Lane, Ewshot, Farnham, Surrey	Low	Although the heritage asset is partially shielded from the Order Limits by vegetation, there is the potential for construction of the project to be visible and/or audible from this heritage asset. There is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Negligible	None Proposed	Minor	Negligible
1864	Well, Heath Lane, Crondall, Farnham, Surrey	Low	Although the heritage asset is very well shielded from the Order Limits by vegetation, there is the potential for construction of the project to	Short Term	Minor	Negligible	None Proposed	Minor	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			be visible and/or audible from this heritage asset. There is the potential for a noticeable change to the setting of this historic building.						
1869	The Ship Inn	Low	This heritage asset is situated within close proximity to the Order Limit. The pipeline route at this location follows the line of Ship Lane and Ringwood Road. There is the potential for construction to be visible and/or audible from this location on the setting of this heritage asset; however, the heritage asset's current proximity to major thoroughfares indicates that this impact is unlikely to result in more than a noticeable change to the setting of this heritage asset.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
1875	Farnborough Railway Station, Union Street, Farnborough, Hampshire, GU14 7NL	Low	Due to the height of the railway bridge and the potential for views from it, there is the potential for construction to be visible and/or audible from this location such that the setting of this heritage asset is noticeably changed. However, the infrastructure and transportation related	Short Term	Minor	Negligible	None Proposed	Minor	Negligible

			neighbouring properties, there is the potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be above that which may be experienced within the current agricultural setting and there is therefore the potential for a slight change to the setting of this historic buildings that hardly affects it.						
1889	Alma House	Low	Although the heritage asset is largely shielded from the Order Limits by dense vegetation it is situated near to a roadway which has the potential for increased noise and visual intrusion due to construction traffic. There is the potential for a change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1891	256, 258, 260 Upper Chobham Road	Low	Although this heritage asset is very well shielded by vegetation, there is potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly more than that experienced from the junction of the B311 and B3015, resulting in very	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			minor changes to the setting of this heritage asset.						
1892	Frimley Church Of England Primary School	Low	Although well shielded by vegetation and neighbouring properties, there is the potential for the construction of the project to be visible and/or audible from this heritage asset. There is also the potential for the removal of trees within sightline of this heritage asset, however, this vegetation does not contribute to the value of this heritage asset or characterise its setting. Overall there is the potential for a noticeable change to the setting of this historic building.	Short Term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
1899	War Memorial, St Peters Church, Frimley	Low	It is unclear if this memorial is situated inside the church building or within the churchyard; if exterior to the church there is the potential for increased construction to be visible and/or audible from this location on the setting of this heritage asset due to construction traffic in relation to the Construction Compound off of Frimley Green Road. This would result in a slight change to	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			the setting of this historic building that hardly affects it.						
1900	War Memorial, St Peters Church, Frimley	Low	It is unclear if this memorial is situated inside the church building or within the churchyard; if exterior to the church there is the potential for increased construction to be visible and/or audible from this location on the setting of this heritage asset due to construction traffic in relation to the Construction Compound off of Frimley Green Road. This would result in a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1902	War Memorial, St Peters Church, Frimley	Low	It is unclear if this memorial is situated inside the church building or within the churchyard; if exterior to the church there is the potential for increased construction to be visible and/or audible from this location on the setting of this heritage asset due to construction traffic in relation to the Construction Compound off of Frimley Green Road. This would result in a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
1921	Yockley House	Low	This heritage asset lies opposite the B3015 road from the Order Limits and is well shielded by neighbouring properties and surrounding vegetation. However, the proximity of this heritage asset to the Order Limits indicates the potential for construction to be visible and/or audible from this location during construction on the setting of this heritage asset that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1925	Whitmore Farm	Low	This heritage asset lies over 400m from a Proposed Logistics Hub. There is a potential for construction to be visible and/or audible from this location from increased construction traffic along Church Road and New Road resulting in a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1927	Audley Cottage And Corner Cottage	Low	This heritage asset lies over 400m from a Proposed Logistics Hub. There is a potential for construction to be visible and/or audible from this location from increased construction traffic along Church Road and New Road	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			resulting in a slight change to the setting of this historic building that hardly affects it.						
1928	Vine Cottage	Low	This heritage asset lies over 400m from a Proposed Logistics Hub. There is a potential for construction to be visible and/or audible from this location from increased construction traffic along Church Road and New Road resulting in a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1929	Garden Cottage	Low	This heritage asset lies over 400m from a Proposed Logistics Hub. There is a potential for construction to be visible and/or audible from this location from increased construction traffic along Church Road and New Road resulting in a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1930	Heatherside House & Heatherside Court	Low	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset. This heritage asset is no longer physically associated with Heatherside House Gardens (Asset 772)	Permanent	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			which historically formed the setting of this historic building and any potential physical impact on Asset 772 would have the potential for a slight change to the setting of Asset 1930 that would hardly affect it.						
1931	The Hedges	Low	This heritage asset lies over 400m from a Proposed Logistics Hub. There is a potential for construction to be visible and/or audible from this location from increased construction traffic along Church Road and New Road resulting in a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1933	High Lodge	Low	This heritage asset is well shielded from the Order Limits by dense vegetation and surrounding properties. The pipeline route follows a current road at this location. Any construction to be visible and/or audible from this location during construction is not anticipated to be significantly changed from that caused by the current roadway. There is therefore the potential for, at most, a slight change to the setting of	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			this historic building that hardly affects it.						
1934	Heydon Cottages	Low	This heritage asset lies over 400m from a Proposed Logistics Hub. There is a potential for construction to be visible and/or audible from this location from increased construction traffic along Church Road and New Road resulting in a slight change to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible
1947	Walled Garden (Laleham Nursery)/Gardner's Cottage (White House)	Low	Although well shielded by vegetation, there is potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly more than that experienced within the agricultural and industrial setting (the land crossed by the project at this location has been utilised for quarrying). There is the potential for increased construction to be visible and/or audible from this location along Shepperton Road due to construction related traffic. This has the potential for slight changes to the setting of this historic building that hardly affects it.	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
1948	Laleham Abbey Icehouse	Low	Although well shielded by vegetation, there is potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly more than that experienced within the agricultural and industrial setting (the land crossed by the project at this location has been utilised for quarrying and landfill), resulting in changes to the setting of this heritage asset which would hardly affect it.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
1949	School Cottages	Low	Although well shielded by vegetation and neighbouring properties, there is potential for construction of the project to be visible and/or audible from this heritage asset. This is unlikely to be significantly more than that experienced within the agricultural and industrial setting (the land crossed by the project at this location has been utilised for quarrying), resulting in very minor changes to the setting of this heritage asset.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
1950	Laleham Village Hall	Low	Although well shielded by vegetation and neighbouring properties, there is potential for construction of the project	Short Term	Negligible	Negligible	None Proposed	Negligible	Negligible

			and/or audible from this location. There is the potential for, at most, a very small change to the historic landscape character of this HLT.						
HLT86	Brockwood Park	Medium	The southwestern-most corner of this park is within the Order Limits; however, the vegetation marked on the 1888 Ordnance Survey mapping at this location has already been removed. No impact to historic landscape elements is therefore predicted. There is the potential for construction to be visible and/or audible from this HLT; however it is unlikely to be significantly above that which would result from normal agricultural machinery operating within the vicinity. Due to the proximity of this HLT to the Order Limits, this has the potential to result in limited changes to the historic landscape character of this HLT.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
HLT87	Chawton House HLT	High	No physical impacts to this HLT are predicted. The close proximity of the Registered Park and Garden to the	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			Order Limits indicates that there is the potential for construction to be visible and/or audible from this location; however, the pipeline route is situated to the south and east of this HLT, and the grounds on these sides are bordered by dense treed vegetation (Jacobs Cultural Heritage Walkover Survey July 2018) which will provide significant shielding. There is also unlikely to be a large increase in noise or visual intrusion beyond what would result from normal agricultural machinery operating within the vicinity. The potential for noise and visual impact would therefore result in, at most, limited changes to historic landscape character of this HLT.						
HLT89	Defense Area 34 Ewshot	Medium	There will be no physical impact to any of the associated archaeological remains which are situated within Defense Area 34 and which contribute to this HLT's value. There is also the potential for the removal of landscape elements of this	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			HLT, however the surrounding vegetation does not contribute to our understanding of this HLT. Construction would be visible and audible as the pipeline route is located within the boundaries of this HLT. Overall there is the potential for changes to the setting of this HLT but which would not affect its value.						
HLT90	Cove Brook Linear Park	Low	It is unclear to what extent the Cove Brook Linear Park extends outwards from the Cove Brook itself. The Cove Brook itself is crossed by a HDD trenchless crossing just north of a railway line. There is the potential for some removal of vegetation associated with the park and for construction to be visible and/or audible from this location during construction. As a modern development within a heavily urbanised environment, these potential impacts may result in limited changes to the historic landscape character of this HLT.	Permanent	Minor	Negligible	None Proposed	Minor	Negligible
HLT91	Queen Elizabeth Park	Low	This HLT is a modern park built within the grounds of a	Short term	Moderate	Minor Adverse	None Proposed	Moderate	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			19th century estate. There is the potential for the removal of vegetation, namely trees, as this park is densely planted. The Order Limits follows the route of the existing pipeline where it crosses through this park, which suggests that the vegetation would have already been impacted during the previous installation and are not, therefore, historic. There is also the potential for construction to be visible and/or audible from this location during construction. Overall this may result in moderate changes to the historic landscape character of this HLT.						
HLT93	Farnborough Hill School	Medium	The Order Limits roughly follow the boundary of this HLT, with the addition of a temporary construction compound in a field to the north of this HLT and a drive pit/receiving compound to the southwest of this HLT for an auger bored trenchless crossing. Construction of the project will therefore be fully visible and audible within this HLT. This HLT includes	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			<p>historic landscape elements, namely vegetation, and the potential removal of these would have a permanent adverse effect on this HLT; however, the Order Limit has been designed to avoid the majority of the trees on the grounds, and the removal of vegetation will be limited and primarily restricted to the area of the existing pipeline. This HLT was visited during the Jacobs Heritage Walkover Survey (September 2018) and it was noted that the impact of the existing pipeline, which cuts through the grounds rather than following the boundary edge (which is the proposed pipeline route), is negligible. Overall, there is a potential for changes to the a few key historic landscape elements and temporary and noticeable, but temporary differences in noise quality, resulting in limited changes to historic landscape character.</p>						
HLT100	Botley Park, Homewood Park	Low	No physical impacts to this HLT are predicted. There is the potential for construction to be visible and/or audible	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			from this HLT; however, there is significant shielding from dense vegetation and the surrounding built environment which indicates that, at most, this would result in a very small change to the historic landscape character.						
HLT101	Hardwick Court Farm, Hardwick Lane, Lyne, Chertsey	Low	Although the Order Limits cross through this HLT, it follows the line of the existing pipeline and there are large gaps in the vegetation where the Order Limits cross the field boundaries. No hedgerows associated with this HLT have been identified within the Order Limits. There is the potential for construction to be visible and/or audible from this location; however this is unlikely to be a significant change from that which arises from normal agricultural machinery. Overall, there is the potential for limited changes to the historic landscape character.	Permanent	Minor	Negligible	None Proposed	Minor	Negligible
HLT102	Rutherewyke House	Low	There is the potential for the partial removal of historic landscape elements associated with this HLT,	Short term	Minor	Negligible	None Proposed	Minor	Negligible

			namely vegetation. No hedgerows associated with this HLT have been identified within the Order Limits. There is also the potential for construction to be visible and/or audible from this HLT. Overall this may result in limited changes to historic landscape character.						
HLT103	Sandgates, Guildford Road, Chertsey	Low	The Order Limits cross over the historic boundary of this HLT at the point where it has been overbuilt by the M25 London Orbital Motorway. The pipeline route comprises a HDD trenchless crossing at this point. Therefore no further physical impact to associated historic landscape elements is predicted. There is the potential for construction to be visible and/or audible from this location to the south of the property at the drive pit/receiving compound for the trenchless crossing; however, this HLT is well shielded by vegetation and the potential intrusion is unlikely to be significantly above that which would result from this HLTs current proximity to the London	Short term	Minor	Negligible	None Proposed	Minor	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			Orbital Motorway. Overall this may result in limited changes to historic landscape character.						
HLT104	Woburn Hill House, Woburn Hill, Addlestone, Chertsey	Low	No physical impacts to this HLT are predicted. There is the potential for construction to be visible and/or audible from this HLT; however, there is significant shielding from dense vegetation and the surrounding built environment. Overall, at most, this would result in a very small change to the historic landscape character.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
HLT105	Woburn Farm	High	No physical impacts to this HLT are predicted. The visual quality and noise levels of this HLT are already impacted by the fringe-urban environment in which it is situated. Overall construction may result in very small changes to historic landscape character.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible
HLT106	Clare Park	Low	The Order Limits extend through the historic boundary of Clare Park; however the area of potential impact now primarily comprises an agricultural field under plough and a modern golf course. Although there is	Permanent	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			significant modern intrusion, there is the potential for partial damage or destruction of historic landscape elements, including historically important hedgerow. At most, this would be a change to a few key historic landscape elements and for construction to be visible and/or audible from this location resulting in limited changes to the historic landscape character.						
HLT108	Preshaw House	Medium	No physical impacts to this HLT are predicted. The area of this HLT which extends to within the study area comprises dense woodland which provides shielding for the further Preshaw House grounds. There is the potential for construction of the project to be visible and/or audible from this HLT; however this is unlikely to be a significant change from that which arises from normal agricultural machinery. Overall, there is the potential for limited changes to the historic landscape character.	Short term	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
HLT111	Manx Farm Parkland	Low	No physical impacts to this HLT are predicted. There is the potential for construction of the project to be visible and/or audible from this HLT; however this is unlikely to be a significant change from that which arises from normal agricultural machinery. Overall, there is the potential for a very small change to the historic landscape character.	Short term	Negligible	Negligible	None Proposed	Negligible	Negligible

Table 1.3 Heritage Assets with No Impact Prior to Good Practice Measures During Construction

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
4	Old Gate House	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
6	Brick Lined Well	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
7	Prehistoric Burnt Flint Scatter	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
10	Prehistoric Flints And Multi-Period Pottery Sherds	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
11	Stapleford Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
13	Uplands Farm: Barn 30 Yds South West Of Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
15	Farmhouse At Uplands Farm	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
20	Roman Kiln	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
37	Mitford	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
39	Goddards	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
40	Post Medieval Quarry 2	Negligible	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
41	Maddoxford Farm	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
43	Newhouse Farm; Granary 30 Yds East Of Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
44	Newhouse Farm; Small Barn 40 Yds North East Of Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
49	Newhouse Farm; Barn 30 Yds South East Of Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
51	High House	Medium	There are no impact pathways for effects on setting due to the	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			distance and inherent shielding between the project and this heritage asset.						
52	The Fish House, Kytes Lane	Low	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
56	Lower Wangfield Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
58	Elm Tree Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
59	Barn Immediately East South East Of Elm Tree Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
60	Durley Mill Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
61	Durley Mill , Mill House	High	There are no impact pathways for effects on setting due to the distance and inherent shielding	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			between the project and this heritage asset.						
62	Tarrytown	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
63	Barn 10 Metres East Of Durley Millhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
65	Ditched Enclosure 275M South Of Durley Manor Farm	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
69	Stakes Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
71	Site Of Ploughed Out Disc Barrow, West Of Park Farm	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
73	Cross Lanes Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
74	Former Quarry 675M North West Of Peak Cottage	Negligible	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
75	Dell Cottages	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
76	Ashton House	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
77	Old Farm	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
78	Little Manor	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
79	Barn 20M South Of Chapel Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
80	Chapel Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
81	Complex System Of Enclosures And Tracks South West Of Lomer Farm	Medium	No physical impacts on this heritage asset, or on Asset 1141 which is potentially associated, are predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact o	n/a	No Change	Negligible	None Proposed	No Change	Negligible
82	Cherry Tree Cottage	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
84	Jarmans Cottage	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
85	Artefact Spread 530M West Of Cross Lanes Farm	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
86	Domestic Site 980M West Of Street End Farm	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
87	Strete End	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
88	Belmore House	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
90	Bowl Barrow 1	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and its relationship with other barrows within the vicinity; however any potential noise or visual intrusion would have	n/a	No Change	Negligible	None Proposed	No Change	Negligible
93	Findspot, Stephen's Castle Down 1	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
98	Barn 50M North East Of Dean Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
99	Barn 40M North Of Dean Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			between the project and this heritage asset.						
100	Stephens Castle Down Barrow	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
101	Dean Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
102	Granary 10M North Of Dean Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
110	Preshaw House	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
111	Iron Age Field System, West Of Rabbit Copse	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
113	West Of Rabbit Copse, Barrow	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage						
114	North Of Rabbit Copse, Barrow	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
115	Rabbit Copse, Barrow	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
118	Neolithic Axe, Field North Of Lomer Farm	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
122	College Down Farm Cottages	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
124	Round Barrow	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			visual intrusion would have no impact on our understanding and appreciation of this heritage						
125	Riversdown	High	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
128	Stable Block 5M South West Of Malthouse Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
129	Malthouse Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
130	Old Curates House	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
131	Bramdean Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
132	Bowl Barrow And Inhumation, Hinton Ampner/1930	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
140	Field South Of Brockwood Park	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
146	Findspot, Gravel Pit 1 Mile East Of Bramdean	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
148	Brockwood Copse	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
149	Brockwood Park House	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
150	Wellhouse 2 Metres South Of Bere Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
151	Bere Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
152	Granary 8 Metres South	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
	Of Bere Farmhouse		between the project and this heritage asset.						
153	Barn And Cartshed In Farmyard 100M East Of Brockwood House	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
154	Barn In Farmyard 100M East Of Brockwood House	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
155	Granary In Farmyard 100M East Of Brockwood House	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
156	Brockwood Lodge	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
158	Barn At Hinton Woodlands Farm, 30M South West Of Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
159	Hinton Woodland Farmhouse	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
160	Hinton Woodland Cottages	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
161	Pits	Negligible	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
163	Ring Ditch 1	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
164	Field System 2	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
165	Barrow 1	Medium	No physical impacts on this heritage asset, or on other known archaeological remains which form the broader setting of this	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			heritage asset, are predicted. The value of this heritage asset is primarily derived from its physical remains and any potential no						
167	Field System 4	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
168	Chalk Pit 1	Negligible	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
169	Boundary Ditch	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
170	Barrow 2	Medium	No physical impacts on this heritage asset, or on other known archaeological remains which form the broader setting of this heritage asset, are predicted. The value of this heritage asset is	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			primarily derived from its physical remains and any potential no						
171	Chalk Pit 3	Negligible	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
172	A Complex Of Linear And Irregular Features	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
173	Ring Ditch 2	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
174	Ring Ditch 3	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			impact on our understanding and appreciation of this heritage						
175	Cropmarks East Of Bramdean Common	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
176	Barrow 3	Medium	No physical impacts on this heritage asset, or on other known archaeological remains which form the broader setting of this heritage asset, are predicted. The value of this heritage asset is primarily derived from its physical remains and any potential no	n/a	No Change	Negligible	None Proposed	No Change	Negligible
177	Barrow 4	Medium	No physical impacts on this heritage asset, or on other known archaeological remains which form the broader setting of this heritage asset, are predicted. The value of this heritage asset is primarily derived from its physical remains and any potential no	n/a	No Change	Negligible	None Proposed	No Change	Negligible
178	Pit 1	Negligible	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			impact on our understanding and appreciation of this heritage						
179	Enclosure 2	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
180	Pit 2	Negligible	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
181	Enclosure 3	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
182	Field System 5	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			impact on our understanding and appreciation of this heritage						
183	Barrow 5	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
184	Enclosure 4	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
185	Field System 7	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
186	Pit 3	Negligible	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			impact on our understanding and appreciation of this heritage						
187	Field System 8	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
188	Church Of St Mary Magdalene	High	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
189	Site Of Telegraph Station	Low	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
190	Field System 9	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
191	Linear Features, Soames Farm	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
192	Lyewood Cottage	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
193	Soames Place	High	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

1495	123, Guildford Street	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1496	127-133, Guildford Street	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1497	Chertsey Conservation Area	Medium	No physical impact on this heritage asset is predicted. There are no impact pathways for effects	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			on setting due to the distance and inherent shielding between the project and this heritage asset.						
1498	Corporation Of London Tax Post, thameside, Chertsey	Low	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1499	Rectilinear And Ring Ditch Cropmarks, Littleton	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1503	Abbey Mews	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1504	Earthworks On Laleham Burway	High	No physical impact on this heritage asset is predicted. There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1505	Icehouse At Laleham Park, Laleham	Low	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
1507	Bronze Age Features And Cremations: Home Farm, Laleham	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1508	Bronze Age Settlement, Land At Home Farm, Laleham	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1509	Neolithic/Bronze Age Flint Working Site: Home Farm, Laleham	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1510	London-Silchester Roman Road	Low	The proposed route of this heritage asset follows the modern Staines Road and, if archaeological remains associated with this heritage asset were present, they would likely have been destroyed by this previous development. No change is therefore predicted	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1511	Ring Ditch Cropmarks, Laleham 1	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
1512	Bronze Age Field System, Woodthorpe Road, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1513	Roman Field System - Continuation Of Use Of Field System Established In The Bronze Age, Woodthorpe Road, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1514	Middle Iron Age Settlement, Woodthorpe Road, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1515	Rectangular Post-Built Structure With Internal Division, Unknown Date, Woodthorpe Road, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1516	Mid/Late Neolithic Ring Ditch - Possible Hengiform	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
	Monument Or Barrow, Woodthorpe Road, Ashford								
1517	Mesolithic Flint Blade, Woodthorpe Road, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1518	Possible Fieldsystem And Ditch: Brooklands College, Church Road, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1519	Low Broad Bank, Ashford	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1520	Clockhouse Lane Gravel Pits, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1522	20th Century Landfill Site, Clockhouse Lane, (West Of), East Bedfont	Negligible	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			impact on our understanding and appreciation of this heritage						
1523	Possible Roman Features: Ashford Hospital, Long Lane, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1524	Bronze Age Enclosure And Features: Ashford Hospital, Long Lane, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1525	Prehistoric Struck Flints, Baked Clay And Pottery: Ashford Hospital, Long Lane, Ashford	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1526	Land At Long Lane, Stanwell	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1527	Staines Road, (North Of). [Heathrow Oil Terminal], West Bedfont {20th Century Landfill}	Negligible	The proposed route may impact this heritage asset; however, as a Modern landfill site, this heritage asset has no archaeological interest and no archaeological materials that would be altered.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1528	Earthworks And Enclosure	Medium	No physical impact on this heritage asset is predicted. The	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
	Cropmarks, Stanwell		value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage						
1529	Gracious Pond, Enclosure	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1530	Mayfield Farm	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1531	Ring Ditch Cropmarks, Stanwell	Negligible	This heritage asset has been previously destroyed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1532	Two Ring Ditch Cropmarks, Stanwell	Medium	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1550	NMP Oval Features	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or	n/a	No Change	Negligible	None Proposed	No Change	Negligible

	School, Upper Froyle		distance and inherent shielding between the project and this heritage asset.						
1819	Barn 5 Metres South West Of Pullens	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1820	Pullens	Medium	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1821	Iron Age Pottery Sherd	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1822	Field Boundaries	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understanding and appreciation of this heritage	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1823	Roman Urn	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1824	Prehistoric Saddle Quern, Ne Of Barley Pound	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
1825	Mesolithic Tranchet Axe Findspot	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1826	Pike House	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1827	Chapel Of The Resurrection	Low	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1829	Outbuildings	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1830	Newton Davis Complex	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
1831	Burnham House	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1832	Farm Building	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1833	Stores	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1834	Probably Former Site Of Farnborough Court	Low	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
1835	Pavilion	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1836	Heywood Building	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1837	Treloar School Dining Rooms	Negligible	If archaeological remains are present, no physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical remains and any potential noise or visual intrusion would have no impact on our understa	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1838	Housing Estate, Rafborough	Low	There are no impact pathways for effects on setting due to the distance and inherent shielding between the project and this heritage asset.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
1839	West Tisted	Low	No physical impact on this heritage asset is predicted. The value of this heritage asset is primarily derived from its physical	n/a	No Change	Negligible	None Proposed	No Change	Negligible

			impact on our understanding and appreciation of this heritage						
2011	Neolithic Flint Axe Findspot	Negligible	This heritage asset has been previously removed and cannot therefore be impacted further.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
2012	Fieldview	Medium	This heritage asset is situated within 1km of a Construction Logistics Hub. There are no pathways for impact on setting due to the inherent shielding from neighbouring properties.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
2013	The Museum At Lord Mayor Treloar Hospital	Medium	This heritage asset is situated within 1km of a Construction Logistics Hub. There are no pathways for impact on setting due to the inherent shielding from vegetation and neighbouring properties.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
2014	Little Barton	Medium	This heritage asset is situated within 500m of a Construction Logistics Hub. There are no pathways for impact on setting due to the inherent shielding from neighbouring properties.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
2015	Chawton Park Farmhouse	Medium	This heritage asset is situated within 500m of a Construction Logistics Hub. There are no pathways for impact on setting due to the inherent shielding from vegetation.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
2016	Baigens	Medium	This heritage asset is situated within 500m of a Construction Logistics Hub. There are no	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			pathways for impact on setting due to the inherent shielding, particularly in relation to the A31 which separates this heritage asset from the Construction Logistics						
2017	Pound Farmhouse	Medium	This heritage asset is situated within 500m of a Construction Logistics Hub. There are no pathways for impact on setting due to the inherent shielding, particularly in relation to the A31 which separates this heritage asset from the Construction Logistics	n/a	No Change	Negligible	None Proposed	No Change	Negligible
2018	Thatch Cottage	Medium	This heritage asset is situated within 500m of a Construction Logistics Hub. There are no pathways for impact on setting due to the inherent shielding, particularly in relation to the A31 which separates this heritage asset from the Construction Logistics	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT84	Bramdean House	High	No physical impacts to this HLT are predicted. There are no impact pathways for noise or visual intrusion due to the distance and inherent shielding between the project and this HLT.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT88	Bury Court	Low	No physical impacts to this HLT are predicted. There are no impact pathways for noise or visual intrusion due to the distance and	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			inherent shielding between the project and this HLT.						
HLT92	St Michaels Abbey	Medium	No physical impacts to this HLT are predicted. This HLT is bounded to the north by a railway line, to the west by the A325, and to the east by a railway line and the A331. This HLT therefore experiences visual and noise intrusion from the railway and urba	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT94	Frimley Park	High	No physical impacts to this HLT are predicted. There are no impact pathways for noise or visual intrusion due to the distance and inherent shielding between the project and this HLT.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT95	Bagshot Park	High	No physical impacts to this HLT are predicted. There are no impact pathways for noise or visual intrusion due to the distance and inherent shielding between the project and this HLT.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT96	Westcroft Park, Chobham	Low	No physical impacts to this HLT are predicted. There are no impact pathways for noise or visual intrusion due to the distance and inherent shielding between the project and this HLT.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT97	Chobham Place	Low	No physical impacts to this HLT are predicted. There are no impact pathways for noise and visual intrusion due to the distance and	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			inherent shielding between the project and this HLT.						
HLT99	Fan Court, Longcross Road, Chertsey	Low	This HLT is no longer extant as a whole and the surviving historic landscape elements of this HLT are considered to be mostly unrelated physically to each other. No physical impacts to this HLT are predicted. There are no impact pathways for noise and vis	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT107	Wintershill Hall	Unknown	No physical impacts to this HLT are predicted. This HLT is bordered by treed vegetation and is well shielded from the Order Limits and there are therefore no impact pathways for noise or visual intrusion.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT109	St Ann's Court	High	No physical impacts to this HLT are predicted. There are no impact pathways for noise or visual intrusion due to the distance and inherent shielding between the project and this HLT.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT110	Froyle House HLT	Low	No physical impacts to this HLT are predicted. There are no impact pathways for noise or visual intrusion due to the distance and inherent shielding between the project and this HLT.	n/a	No Change	Negligible	None Proposed	No Change	Negligible
HLT112	Scattered settlement with paddocks pre-1811 extent	Medium	This HLT is situated within 500m of a Construction Logistics Hub. No physical impacts to this HLT are predicted and there are no	n/a	No Change	Negligible	None Proposed	No Change	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Construction	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures or Mitigation	Residual Magnitude	Residual Significance
			pathways for noise or visual intrusion due to the inherent shielding from vegetation.						

1.2 Operation

- 1.2.1 Effects on the historic landscape sub-topic during operation has been scoped out of the assessment (see Section 9.2 in Chapter 9 of the ES).
- 1.2.2 No historic buildings or archaeological remains have been assessed as having a significant effect during operation.
- 1.2.3 Table 1.4 outlines potential impacts to historic buildings and archaeological remains which would result in a minor or negligible significance of effect, i.e. no significant effects in EIA terms, prior to good practice measures during operation.
- 1.2.4 All other historic buildings and all archaeological remains have been assessed as having no impact prior to good practice measures during operation. This is most often due to the limited contribution that setting has on the value of many below-ground archaeological remains and the inherent distance and/or shielding between the heritage assets and the project.

Table 1.4 Historic Buildings and Archaeological Remains with Potential Impacts Resulting in No Significant Effects Prior to Good Practice Measures During Operation

Asset Number	Site Name	Value	Potential Impact Description - Operation	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures	Residual Magnitude	Residual Significance
53	Granary 5M South Of Netherhill House	Medium	This heritage asset is situated over 200m to the south of the proposed pigging station at Boorley Green. Although the historic building and the valve location are both bordered by vegetation, this valve location may be partially visible from this location and there is the potential for a change to the setting of the historic building such that it is noticeably changed.	Permanent	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
54	Netherhill House	Medium	This heritage asset is situated over 200m to the south of the proposed pigging station at Boorley Green. Although the historic building and the valve location are both	Permanent	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Operation	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures	Residual Magnitude	Residual Significance
			bordered by vegetation, this valve location may be partially visible from this location and there is the potential for a change to the setting of the historic building such that it is noticeably changed.						
72	Cross Lane Cottage	Medium	This heritage asset is situated over 150m to the south of Valve 2 at Cross Lane. Although the historic building is shielded by vegetation and a neighbouring building, this valve location may be partially visible from this location and there is the potential for a slight change to the setting of the historic building that hardly affects it.	Permanent	Negligible	Negligible	None Proposed	Negligible	Negligible
639	Saddling Stables To West Of The Road At Tweseldown Racecourse	Medium	This heritage asset is situated over 125m to the southeast of Valve 8 at Tweseldown Racecourse. This valve location may be visible from this heritage asset and there is the potential for a change to the setting of the historic building such that it is noticeably changed. This would not affect the value of this heritage asset.	Permanent	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse
640	Saddling Stables To East Of The Road At Tweseldown Racecourse	Medium	This heritage asset is situated over 150m to the southeast of Valve 8 at Tweseldown Racecourse. This valve location may be visible from this heritage asset and there is the potential for a change to the setting of the historic building such that it is noticeably changed. This would not	Permanent	Minor	Minor Adverse	None Proposed	Minor	Minor Adverse

Asset Number	Site Name	Value	Potential Impact Description - Operation	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures	Residual Magnitude	Residual Significance
			affect the value of this heritage asset.						
641	Hay Barn At Tweseldown Racecourse	Medium	This heritage asset is situated over 150m to the southeast of Valve 8 at Tweseldown Racecourse. This historic building is partially shielded by the neighbouring building; however, this valve location may be visible from this heritage asset and there is the potential for a slight change to the setting of the historic building that would hardly affect it. This would not affect the value of this heritage asset.	Permanent	Negligible	Negligible	None Proposed	Negligible	Negligible
642	Offices At Tweseldown Racecourse	Medium	This heritage asset is situated over 150m to the southeast of Valve 8 at Tweseldown Racecourse. This historic building is partially shielded by the neighbouring building; however, this valve location may be visible from this heritage asset and there is the potential for a slight change to the setting of the historic building that would hardly affect it. This would not affect the value of this heritage asset.	Permanent	Negligible	Negligible	None Proposed	Negligible	Negligible
643	Grandstand & Jockey Quaters At Tweseldown Racecourse	Medium	This heritage asset is situated over 150m to the southeast of Valve 8 at Tweseldown Racecourse. This historic building is well shielded by the neighbouring building; however, this valve location may be visible from this heritage asset and there is the potential for a slight change to	Permanent	Negligible	Negligible	None Proposed	Negligible	Negligible

Asset Number	Site Name	Value	Potential Impact Description - Operation	Potential Impact Duration	Magnitude	Significance of Effect	Good Practice Measures	Residual Magnitude	Residual Significance
			the setting of the historic building that would hardly affect it. This would not affect the value of this heritage asset.						
644	Underpass At Tweseldown Racecourse	Medium	This heritage asset is situated over 200m to the east of Valve 8 at Tweseldown Racecourse. This historic building is well shielded by fencing and vegetation; however, this valve location may be partially visible from this heritage asset and there is the potential for a slight change to the setting of the historic building that hardly affects it.	Permanent	Negligible	Negligible	None Proposed	Negligible	Negligible
646	Basingstoke Canal	Medium	There is the potential for pipeline markers to be visible from this heritage asset. The small size of the marker posts and the inherent shielding of the heritage asset by current infrastructure indicates the potential for a slight change to the setting of the historic building that hardly affects it.	Permanent	Negligible	Negligible	None Proposed	Negligible	Negligible
676	Main Building To Farnborough Hill Convent	High	There is the potential for pipeline markers to be visible from this heritage asset. The small size of the marker posts indicates the potential for a slight change to the historic building that would hardly affect it.	Permanent	Negligible	Minor Adverse	None Proposed	Negligible	Minor Adverse
830	The Old Cottage In The Grounds Of	Medium	This heritage asset is situated over 150m west of Valve 12 at Steep Hill. This historic building is shielded by vegetation and	Permanent	Negligible	Negligible	None Proposed	Negligible	Negligible
