1. INTRODUCTION

- 1.1.1. In line with Regulation 14(4)(b) of the DCO EIA Regulations, this Environmental Statement (ES) and all technical assessments which inform it have been undertaken by a suitably qualified project team.
- 1.1.2. WSP has been appointed by the Applicant to undertake the Environmental Impact Assessment (EIA) for the DCO Proposed Development and is responsible for the ES. The team that has prepared the ES are competent experts in EIA and the Institute of Environmental Management and Assessment (IEMA) has awarded WSP the EIA Quality Mark for holistic activity around EIA. WSP has continued to maintain this following ongoing, annual examination in relation to ongoing products, staff, innovation and promotion of EIA within the industry. WSP has and continues to support and lead nationally recognised guidance for EIA in the UK.
- 1.1.3. It is a combination of the EIA Quality Mark and the experience and qualifications of WSP's practitioners that form part of the EIA team that ensure we comply with this requirement.
- 1.1.4. Furthermore, all technical assessments have been subject to a thorough technical review, to assure technical credibility, followed by subsequent review by the EIA coordination team. To ensure that all deliverables are produced to the necessary high standards, WSP's Business Management System is certified to ISO 9001:2015 standards.
- 1.1.5. In accordance with Regulation 14(4)(b) of the EIA Regulations 2017, the relevant expertise or qualifications of the WSP technical experts responsible for the preparation of this ES are outlined in **Table 1** below.

Role	Qualifications
