FULL TRANSCRIPT (with timecode)

00:00:05:01 - 00:00:14:26

Welcome back. Everybody can just chat with the case manager. The live stream started and the audio is working.

00:00:24:02 - 00:00:45:12

Okay, good. Thank you. Welcome back. The hearing has resumed. We broke off just now just to give the applicant team a few moments to consider some of the information they've heard. Um, we would like to do is ask the applicant's team whether or not they want to respond and think there's somebody coming forward.

00:00:53:15 - 00:00:58:21

And if you want to use the microphone system to introduce yourself and make the points you want to make.

00:01:00:00 - 00:01:32:11

Thank you, sir. Paul, reporter Simon LLP. The lawyers to the applicant and this will be very brief. Thank you for the moment to consider it and we wish to thank those that spoke today for their participation and their detailed and research submissions. There has not been time obviously, and the brief moments we've had for us to respond to them all. We do note that we consider many of the points that they are raising to be outside the scope of the application currently before you. However, we will endeavor to respond to those points which are within the scope of this application.

00:01:32:13 - 00:01:36:01

Once we have had an opportunity to see the written summaries of those submissions.

00:01:38:05 - 00:01:50:05

In particular, we would note that the storage risk raised is outside the scope of this application and that we are the applicant is fully engaged with the regulating authority for that element of the storage project.

00:01:52:15 - 00:02:04:11

With regard to the application of the well-being of Future Generations Act insofar it is relevant to the application before you. We consider that as set out in the planning statement. Report 022.

00:02:07:17 - 00:02:41:23

We have set out a cumulative environmental assessment as required by the regulations in our submitted documents, and we would refer in particular to Rep 4062 as a statement of the cumulative assessment needed for this application. Flood risk has been assessed and considered in the submitted documents and particular rep 4059 and rep 4176. We would also note the venting at Oga's and BBQs has been set out in the air quality chapter of the environmental statement and that's rep for 036.

00:02:45:17 - 00:03:05:06

Insofar as is required for the application. Safety has been assessed and set out in the major Accidents and Disasters chapter of the year. The applicant is also engaged with and will continue to do so, moving into their role as the regulator under the pipeline safety regulations. That is all we wanted to say. Thank you, sir.

00:03:06:26 - 00:03:10:20

Thank you for those comments. All that information is heard and understood.

00:03:13:06 - 00:03:35:08

I would like to make all participants aware that Deadline seven, which is Tuesday the 7th of September. It is a. Possible to make any further comments in that deadline. If you feel you haven't covered all the points you're intended to. As a general rule of thumb,

00:03:36:26 - 00:03:53:23

though, no other parties intending to speak unless anybody else wants to come forward who wants to speak. I'll just give that one final opportunity to do that, to hear from anybody if they've joined the meeting online.

00:03:57:21 - 00:03:59:12

Just a point of clarification.

00:03:59:14 - 00:04:10:06

Deadline seven is Tuesday, September, not the seventh. It's an error in my script. Oh, 5th of September deadline seven.

00:04:10:21 - 00:04:18:24

Oh, So the 5th of September is the deadline seven. There's no other parties raising anything And.

00:04:20:26 - 00:04:27:08

So on that basis, I'm going to hand back to Mr. Butler to conclude the hearing.

00:04:27:28 - 00:05:09:29

Okay. Just just before I come on to the conclusions, if there's anything that any party participating either in the in the room or virtually would have liked to have said but felt unable to do so, we'd invite them to submit those comments in writing by Deadline seven, which, as we've just corrected, is Tuesday the 5th of September 20, 23. Comments from party. Watching the live stream on digital recording can also be submitted in writing by the same deadline. Um, moving on to agenda item five and six, which we're going to take as one item, which is a review of issues and action points and any other business in the closure of the hearing, starting with any other business.

00:05:10:01 - 00:05:14:09

Is there any other matter which any party wishes to raise at this open floor hearing that hasn't been covered?

00:05:15:28 - 00:05:51:27

You know, indication in the room or online. So I'm going to move on to action points. There's no action points as far as the examining authority is concerned. However, we would invite those submissions as early as you wish to submit them, but no later than deadline seven, please. Just so you're aware. Thank you. Um, in terms of the closure of the hearing, we'd like to thank you for your participation in this hearing today. It's been very helpful to listen to, to what you've had to say, um, and to build on the correspondence you already submitted.

00:05:51:29 - 00:06:24:16

Thank you very much for that. Did your recording of the proceedings today will be made available as soon as possible on the project page of the National Infrastructure website. In addition, we request that you submit any written points in writing that you've made here today for publication on the website, and you do so by the latest deadline seven, which is Tuesday fifth September 20th, 23. Following this afternoon's open floor hearing, there is no longer a need to use the Reserve date for the open floor hearing, which was set for tomorrow, which was due to start at 930.

00:06:24:26 - 00:06:55:19

We can confirm that reserve date for this open floor hearing is now cancelled and in accordance with the Rule 13 letter of the 18th of July, no other notice is required of this cancellation. To be clear, um. That's fine. Don't need to read that bit because there's no other hearings planned for today or tomorrow after the cancellation of that meeting. Once again, we'd like to thank you all for all of the parties here today watching the live streaming and watching the digital or listening to the digital recording for their interest in the application.

00:06:56:23 - 00:07:10:20

Specifically like to thank those that have come in in attendance today. Thank you very much. The time now is 1527 and I declare this open floor hearing for the proposed high net carbon dioxide pipeline project closed. Thank you very much.
