Dear PINs Viking Project team

Thank you for your letter dated 3 July 2024.

I write on behalf of Anglian Water Services (IP Ref: 220047182) regarding the Proposed Changes Consultation.

As set out at the Hearing, AWS is pleased to support the reduction in potential land take area for the project to the east of the Louth Water Recycling (WRC) facility. As a developer of pipelines, we understand that their often needs to be a degree of flexibility and therefore land take particularly when pipelines cross under other infrastructure and features such as the canal and river. We have agreed with the Viking project that the CCS pipeline will be as far east as possible within our parcel of land without compromising the existing 560mm water pipe and limiting our ability to access the water pipe on our land for maintenance or in the event of an emergency. The exact route will therefore be determined on site by the project working with our network team to minimise the land that may be sterilised by the CCS pipelines route in this parcel of land, that will be needed for the future expansion of the WRC to accommodate increased flows from existing and planned housing growth at Louth.

AWS will work with the project to finalise our SoCG so this can be agreed and submitted upon the confirmation of the proposed changes and before Deadline 5 of 2.9.24.

Darl Sweetland DMS, MRTPI
