## 1.1 Introduction

1. This Schedule of Negotiations and Powers Sought alongside the Statement of Reasons demonstrates that Chrysaor Production (U.K.) Limited, a Harbour Energy company, (hereafter 'The Applicant') has complied with the CA Guidance related to procedures for the compulsory acquisition of land (DCLG, September 2013).
2. The Applicant has been and continues to seek to acquire the relevant freehold interests, new rights and temporary use of land by private treaty, in order to ensure implementation of the Proposed Development. Whilst seeking compulsory acquisition powers, the Applicant will continue to seek to voluntary agreement wherever possible. This approach of seeking powers of compulsory acquisition in the application for Development Consent Order (DCO), in parallel, conducting negotiations to acquire land by agreement, accords with paragraph 26 of the CA Guidance. Table 1 below sets out the latest position in relation to these voluntary agreements.
3. The CA Guidance states that there must be a clear idea how the land to be acquired is to be used, Table 1 below summarises the reason that acquisition of land/rights and possession is required to accommodate the Scheme.
4. Table 2 below lists plots within the Order land which comprise part of the highway network and whilst an explanation is provided on why the land is required to accommodate the Scheme; a summary of negotiations is not provided here as there are no voluntary rights being sought in relation to the highway other than engaging with the relevant highways authority as part of the DCO process. 1.1.5 Table 3 below sets out the position in relation to Statutory Undertakers who have been identified as having apparatus in the Order land.
5. This Schedule of Negotiations and Powers Sought is one of a number of documents accompanying the application for DCO. It should be read in conjunction with the following documents:
  - Land Plans EN070008/APP/4.3;
  - Works Plans EN070008/APP/4.2;
  - Draft Development Consent Order EN070008/APP/2.1;
  - Book of Reference EN070008/APP/3.3;
  - Statement of Reasons EN070008/APP/3.2;
6. It is envisaged that this Schedule of Negotiations and Powers Sought will be updated at regular intervals throughout Examination, the latest updates will be included in this document in red text at the relevant deadline.

							<p>In April 2024, Gateley Hamer re-issued Heads of Terms to the Affected Party's solicitors which take in to account their concerns and provide certainty that their operations can continue.</p> <p>A number of meetings have been held since to finalise the Heads of Terms, including confirming that the operational yard will not be impacted, with the view to concluding matters before the end of the examination period.</p> <p>The DVSA have previously stated that they would continue to object to the Scheme until they have a voluntary agreement in place with the Applicant.</p> <p>Negotiations between the two parties have been productive since Deadline 4, with the agreement of a route that does not impede the DVSA's operations. Heads of Terms have now been finalised and signed by both parties and the legal contracts are being prepared.</p> <p>The Applicant is working with the DVSA to remove their outstanding objection, and it is hoped that this will occur prior to the end of examination.</p> <p>The Affected Person has requested that the rights sought by the Applicant do not impede their operational land. This required the Applicant to undertake further detailed design to engineer a route in which a preferred corridor could be established in agreement between the Affected Person and the Applicant. There is a high degree of complexity to this process which has required a significant amount of legal and design input that has affected the timing of reaching a consensual agreement.</p>

							<p>A preferred route which does not impede the Affected Person's operational land has since been agreed by both parties. It is anticipated that the objection will be removed once matters conclude.</p>
