

We wish to register our notification to speak at an Open Floor Hearing on behalf of our client BOC Limited (interested party reference number 20049365). Whilst our client supports the Project in principle it objects to the Development Consent Order application due to the absence of protective provisions to safeguard affected BOC assets and property rights; such protective provisions are necessary to ensure that its infrastructure, operations and business continuity are not compromised. This is critical infrastructure which BOC has statutory and regulatory obligations to maintain and repair not only for safety but to ensure resilience in national fuel security and supply.
