Subject: Notification of speaking at the ISH2 on Thursday 14 November 2024
Date: 21 October 2024 16:30:28

Dear Ms Robins,

Registration identification number: 20049368

Following the ExA's Rule 13 & 16 letter of October 15th, I am writing to notify you of my wish to speak at the ISH2 on Thursday 14 November 2024. I will attend remotely.

I may have a legal representative with me. I am not certain yet. Please advise anything which you need to know about that. Essentially as they would be representing me, I assume that I would only have to introduce them at the relevant point in the introduction.

To assist the ExA, I wish to speak on the two requests concerning the DCO in my written representation [REP2-046]. These are:

“I request that the ExA considers if a DCO provision can be drafted in the H2Teesside DCO so that a minimum carbon capture rate is secured in the DCO itself similar to similar provisions already extant in the Net Zero Teesside and Keadby 3 DCOs. The capture rate should be 95% reflecting the assumptions in Applicant’s ES.

I request that the ExA also considers if a similar provision to be drafted in the H2Teesside DCO so that the natural gas supply to the H2Teesside plant must be compliant with the LCHS standard.”

I have read the preliminary agenda at Annex D of the letter, and I am not sure where my request would fit in the timetable. I would appreciate you letting me know which part of the timetable my requests will be tabled. I will later send you any reference documents that I will require.

Best regards

Dr Andrew Boswell
