Dear Sir

Land Within The Boroughs Of Redcar And Cleveland And Stockton-On-Tees, Teesside And Within The Borough Of Hartlepool, County Durham EN070009

Further to our letter of 13 November 2024, we have met with representatives of H2 Teesside Limited regarding the proposed Hydrogen Production Facility, with associated hydrogen distribution network of pipelines and utility connections, on land in Redcar and Cleveland, Stockton-on-Tees, and in Hartlepool on Teesside.

That meeting and subsequent exchange of information was very useful and provided Greenergy the re-assurance that their operation would be safeguarded.

Having reviewed Schedule 18, Article 41 of the latest draft DCO that was submitted at Deadline 5, which set out the provisions for the protection of third-party apparatus that would apply to Greenergy in the absence of bespoke protective provisions, Greenergy are content to withdraw their objections.

The plan below, which was previously circulated, shows Greenergy's current land interests in the area affected by the Proposed Scheme. Within this area Greenergy own various land parcels and have rights over other parcels comprising mostly roads and service routes to which Schedule 18 Protective Provisions should be applied.
