Subject: Silver Street Bridge Godmanchester my ref 10030568

Hello, if I have read the documentation correctly, I can ask to accompany a member of the team to a visit.

If I have read correctly that the bridge at the top of Silver Street in Godmanchester is "BN09 9,300 Silver Street bridge 3 span overbridge with open abutments and precast concrete beam deck. Bridge on a vertical curve with a max level of 48.2m AOD. 68.3" I am horrified to see that is so high...there appears to no other bridge as high as this. I don't think that you can possibly imagine the impact this will have on the environment around Godmanchester. I would welcome the chance to visit this site with the inspection team

yours sincerely
Debra Jones
