Dear Ms Fernandes

Reference: TR010018
A14 Cambridge to Huntingdon Improvement Scheme: Changes to the Application

Thank you for your letter dated 4 August 2015 updating interested parties on progress with the examination of the above application, including proposed changes to the application.

This is to confirm that Historic England has no objections to any of the proposed changes. We note that additional land is required at Mill Common in Huntingdon, which lies within the Huntingdon Conservation Area and abuts the scheduled earthwork to the north. However, given that this land is required for ecological mitigation purposes, this should have limited impact on the significance of the conservation area and scheduled monument. Any mitigation works within this area should consider potential archaeological implications given the proximity of the scheduled monument and the overall archaeological interest of Mill Common.

We hope that this response is of assistance to the examination process. We look forward to further correspondence regarding the examination and would be happy to provide further advice as required.

Yours sincerely

Tom Gilbert-Wooldridge
Principal Historic Environment Planning Adviser
