Subject: A14 Questions

Hello,

I have registered to submit views: no is 10031914.

I would be grateful if you would answer the below

1. Given the UK is behind on its GHG reduction targets how do you justify this scheme?
2. What percentages and tonnage of extra GHG will:
 - a) The construction generate
 - b) The use of the road generate to 2030
- 3) On what basis , if any , would you suggest this scheme is a sustainable development?
- 4) How do you justify the disruption and potential traffic problems to residents of Brampton and Huntingdon ?

Thank you

John Davies
