25th Sept 2015

Following Detailed Design meeting 17th Sept 2015 - end of item 5 on agenda:

.
Thank you for listening and responding to my 2 safety concerns regarding NMU crossing at Brampton.

Summary

1. Danger to pedestrians from cyclists allowed to travel at 30 kph especially silently from behind. I suggest division of lanes is indicated and signage asking cyclists to signal by sound an approach from behind.
2. Current dangerous unofficial crossing of A1 at end of the closed Old Thrapston Rd. I suggest effective blocking of this and improvement of the route to FP15 and the new NMU especially from Laws Crescent estate.

I wish to thank HE for their response and the suggestion of discussion at a community consultation. I would like to be included in an appropriate Community Forum.
