Subject: Re: A14 Cambridge to Huntingdon Improvement Scheme (TR010018)

Dear Sir or Madam, I have asked for the Estimates to Destroy the A14 Huntingdon Viaduct, The Estimate that you last sent to me was in my Estimation too low and I have therefore asked that you take into account every cost the enable the A14 Viaduct to be Destroyed, Could you please provide me with an updated Estimate that is more in line with the Estimates that I have concluded will need to be spent(I have included every cost), My Estimate of £59million is more up to date than the £45million you have quoted.

I drove to Bar Hill(Near Cambridge) Along the A14, And what occurred to me was that if and or when the A14 Viaduct is Destroyed the Traffic problems with the current A14(To be DE-Trunked) will just be transferred to the new A14. I think that to Destroy the Viaduct would not only be Costly around £59million but also ensure that the Traffic issues that the new A14 was meant to solve will actually only have the current issues within a short time of opening, I have asked for an appointment with someone within your department so that I can present the issues and ideas to resolve those issues that will not only save money but in addition have much better outcomes.

Could you please send me an appointment and also the revised figures for the total costs for the Destruction of the A14 Huntingdon Viaduct and the required roads to enable the Destruction to take place.
