30 October 2015

Dear Mr Coombes,

A14 Cambridge to Huntingdon Improvement Scheme: Comments on Exa's Draft Development Consent Order (deadline 13)

Thank you for the opportunity to comment on Examining Authority's Draft Development Consent Order. Please find enclosed comments on behalf of Anglian Water.

We note that the Examining Authority has asked for an update relating to discussions with the applicant relating to the Draft DCO. Following the meeting held on the 10th September with the applicant we have had further discussions relating to Anglian Water's outstanding concerns relating to the Draft DCO. In relation to these issues we are able to respond as follows:

Article 17: Discharge of Water

Anglian Water has previously suggested that Article 17 (8) of the Draft DCO should be removed before the DCO is finalised. The applicant has confirmed that they do not consider it is necessary to remove article 17 (8) as requested by Anglian Water.

We remain of the view that article 17 (8) of the Draft DCO should be removed for the reasons outlined in our written representations dated 12th March 2015.

Part 7: For the Protection of Anglian Water

Anglian Water had requested specific protective provisions in addition to those for utility providers included in Part 1 of the Draft DCO. We note that the Examining Authority's Draft DCO includes the wording proposed by Anglian Water and is supported.

The applicant has confirmed that they are able to agree to the inclusion of protective provisions specifically for the benefit of Anglian Water in the final DCO.

However they have suggested a number of amendments to the wording of the protective provisions proposed by Anglian Water. The proposed amendments have yet to be agreed with the applicant. However we expect to be able confirm our position relating to the proposed modifications by deadline 15.

Should you have any queries relating to this response please let me know.

Yours sincerely
