Highways England Route Map

November 2015

# 1 Introduction

This Route Map provides a guide to Highways England's application for development consent for the A14 Cambridge to Huntingdon improvement scheme. It provides a point of reference to assist with navigation of the application and documents submitted during the examination period.

The Introduction to the Application, submitted in December 2014 (Applicant reference 1.1, PINS reference APP-001), provided an overview of the application documents for the scheme. During the examination of the application Highways England submitted further documents to the Examining Authority, which generally comprised one of two types:

- revised versions of the original application documents submitted in December 2014; and
- documents, which provide supplementary information on the application; these documents were mainly prepared and submitted to the Examining Authority as required by its examination timetable<sup>1</sup>.

The purpose of the Route Map is therefore to:

- introduce the application documents and identify which documents were updated during the examination process; and
- provide a guide to other documents submitted during the examination. Where appropriate, the Route Map also identifies when these documents were updated during the examination.

## 1.1 How to read the Route Map

### Application documents

Section 2 of the Route Map lists the documents submitted as part of the original application.

For each application document the following information is provided:

- a short description of the purpose of the document;
- Highways England reference number; and
- PINS reference number.

This section also states the date on which updated versions of the application documents were submitted to the Examining Authority. Where updates were submitted to the Examining Authority, the examination deadline number<sup>1</sup> and submission date is provided along with an explanation as to why an update was provided.

Throughout Section 2 the original application documents are presented in the left hand column. The right hand column indicates any updates/revisions to the identified document. In this column, a colour gradient has been applied to provide an indication of when during the examination the updates/revisions were made. Lighter colour shades represent earlier submissions with darker shades representing later submissions. A four point scale has been used to indicate when documents were submitted:

- prior to the examination;
- at Deadlines in June and July 2015 (Deadlines 1-5);
- at Deadlines in August and September 2015 (Deadlines 6-10) ; and
- at Deadlines in October and November (Deadlines 11-15).

---

<sup>1</sup> The examination timetable is set out in the Rule 8 letters issued by the Planning Inspectorate dated 21 May 2015, 4 August 2015 and 29 September 2015.

## Examination documents

During the examination of the scheme, various documentation was submitted to the Examining Authority. The Examination Library, which is maintained by the Planning Inspectorate, lists all documents submitted by Highways England and Interested Parties during the examination.

Section 3 of the Route Map identifies new documents, which were submitted by Highways England during the examination. The documents have been grouped into the following themes:

- Scheme changes
- Responses to written and relevant representations from Interested Parties
- Responses to written questions from the Examining Authority
- Statements of Common Ground and the Local Impact Report
- Standalone technical documents
- Summaries of hearings
- Notifications and responses to procedural decisions

For each document, the following information is provided:

- the document title;
- the deadline for which the document was submitted;
- Highways England and PINS reference numbers; and
- the purpose of the document.

This section also identifies where documents produced during the examination were subsequently updated and/or revised. In these cases, the following information is provided: the deadline for which the document was submitted; the Highways England reference number; PINS reference number; and the reason for the documents being updated and/or revised. The page layout and shading of this Section adopts the same approach as Section 2.

A number of cover letters were also produced during the examination, which outline the documents submitted by Highways England at each examination deadline. The letters are not included in the Route Map.
