---

Dear Sir/Madam,

Thank you for the opportunity to comment on the Highway England's response to comments received relating to the non-material amendments to the approved A14 Improvement scheme. The following response is submitted on behalf of Anglian Water.

Anglian Water had previously stated that we would expect Highways England to fund any significant revisions to what had been previously agreed with Anglian Water required as a result of increased traffic flows.

We note that Highways England are of the view that further assessment of Anglian Water's assets is not required based upon the forecast increase in traffic as outlined in the current application. As such we have no further comments to make at this stage.

I would be grateful if you could you confirm that you received this response.

Should you have any queries relating to this response please let me know.

Regards,

**Stewart Patience**

Spatial Planning Manager
