Dear Richard, many thanks for the detailed response to my submission, most appreciated. As the ward member for Hawkedon I am very pleased with the plans to have 2.5 metre high and 2km long high performance absorptive barrier. I would though like to understand why the height is a full metre lower than the proposal for the barriers protecting Sindlesham, Winnersh and Embrook.

I also would like to request that the barrier is extended just a couple of hundred yards eastwards so that all of the estates namely Adwell Drive, Paddick Drive and Barn Croft will enjoy the same level of protection.

Many thanks

Tim Holton
