

6th February 2016.

Subject: "Applicant's Entrained Noise Mitigation Study"

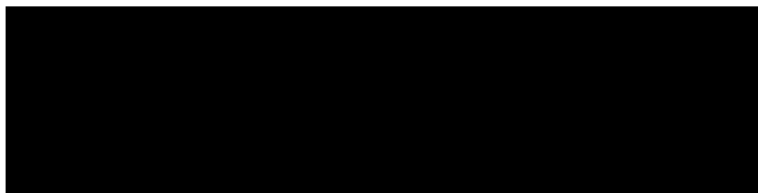

Dear Mr. Price (and to whom it may involve)

Despite the very helpful accompanied inspection visit here in The Mythe on November 12th last year, and the many assurances we received in answer to our concerns regarding noise levels in particular, I am surprised and very concerned indeed that your plan for proposed measures in the vicinity of The Mythe (Page 12) do not show that any changes will be made here. There is no indication of the requested acoustic barrier, and indeed it would appear from the notes on the plan ^{that} there is to be no change at all to the existing barrier, not even in height!

In addition, there have been residents' requests for the 'solid noise fencing' to be completed around the whole

Curvature of the M4 around The Pythe, which until now has been sadly lacking, and which will be needed more than ever once the new M4 is completed. The existing noise protection fence at the northern end of The Pythe is already not adequate as a general barrier against motorway noise in The Pythe. We need all the noise protection possible here, and I ask you and your team to comply with my request for this very serious matter to be looked at once again.

Yours sincerely,

MRS JEANNINE COOPER.
