**NOTES**

- All existing vegetation identified within the Order limits shall be retained where reasonably practicable. Prior to any vegetation clearance all areas of existing vegetation are to be assessed by a qualified Landscape Architect and ecologist. Further landscape and/or ecological measures may apply.
- The locations of nature conservation fencing are indicative. The precise alignment of fencing is to be finalised on site.
- Although the extents of the environmental barriers are fixed laterally, the location within the verge is subject to finalisation.
- Areas of existing woodland and scattered trees are indicative and show the extent of tree canopies, based on preliminary site information received. The exact areas shown may be subject to change on receipt of detailed topographic surveys.
- Type of environmental barriers include reflective acoustic barriers and absorptive acoustic barriers as noted in the barrier information at the specific locations.
- Refer to Cover Sheet for information on draft planting schedules and specification notes.
