

Dear Sir/Madam,

Today is the deadline for the Silvertown Tunnel and we are writing once more to object to the proposed crossing. .

We live at [REDACTED] and we, along with other inhabitants of our street and those on Westcombe Hill and the surrounding area, have severe concerns about this proposed crossing.

You know we currently live in one of the most polluted parts of the UK - with both noise and traffic. Our health and our houses are already at risk and now that risk increases even more with this tunnel.

Our houses have cracks in the walls and the windows constantly rattle as trucks travel past.

Constant gridlocks on the A102 run alongside our houses day and night. The traffic trying to escape comes down into our roads and blocks those too.

Building a tunnel at Silvertown will only add to this. More roads equal more traffic - just look at the M25 as an example.

Furthermore, charging for the Silvertown crossing will only push more traffic to the Blackwall Tunnel.

Come and stand in our garden and experience the noise and the fumes and the shaking of the walls inside the house.

We care deeply about Siebert Road and its surrounding area. We want to ensure that it is a healthy, happy place for everybody to live.

Which means this tunnel must not go ahead.

Thank you,

Helen Hutchinson and Duncan Marley
