

Dear Sir/Madam,

We live at [REDACTED].

There is an assumption that 520+OHVs will not affect noise pollution.

This is an assumption that is factually inaccurate and can easily be disproven by adding monitoring equipment along the affected areas - those houses that back onto the A102.

You are very welcome to visit Siebert Road. Stand in our gardens, hear the noise and smell the exhaust of the constant traffic. Our houses already shake as the trucks go past. There is a serious risk of significant structural damage if this plan goes ahead.

Install monitoring equipment, come and visit us and find out exactly what impact OHVs are having on our area.

Yours sincerely,

Helen Hutchinson and Duncan Marley
