Dear Sir/Madam,

This is an illiterate use of our carbon budget and limited public finances.

We need a wholesale move away from high energy, high carbon, low occupancy motor traffic. This tunnel is dinosaur 20th century planning.

Freight already has many options to cross the river.

Silvertown Tunnel will increase particulate air pollution and not solve congestion. Throughout the last 50 years we have seen that new roads just induce more motor traffic. Look at the new Forth Bridge as an example of a road congested within hours of opening.

Your sincerely
Rosalind Readhead
